Selling

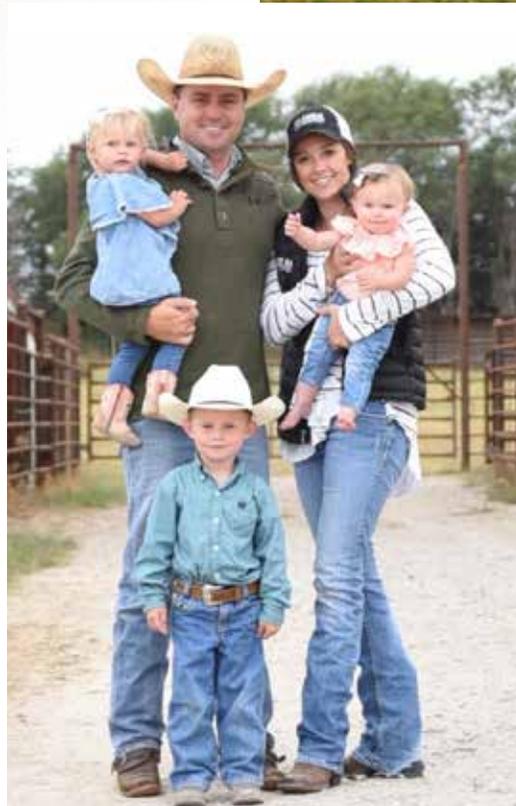

275+ POWERFUL ANGUS BULLS
50 YEARLING HEIFERS / 8 RANCH BROKE GELDINGS

Greetings Fellow Cattlemen -

Welcome to TD Angus at Rishel Ranch. This is our largest offering to date with over 70 fall 18-month old bulls, 200 yearling bulls, 50 yearling heifers, and 8 broke ranch geldings. Since our acquisition of the historic Rishel Angus cow herd in 2017 from Bill and Barb Rishel, we have continued towards a program goal based on one simple mantra: "The most of the best" and this year's offering is the epitome of that.

The first time I had heard Bill use the term, "the most of the best" was in a sorting alley and it was simply the response to my question of how to select replacement heifers. "Make her have the most of the best," he said. I don't think I've ever had more resonating advice in my life and it fits in all aspects. Since that day, it has fueled our program to elevated and unprecedented heights. After every year in this business, it becomes more and more clear that "the most of the best" isn't a destination, but a journey. And what a journey we're on.

It is our mission as seedstock producers to not only provide proven, predictable and sustainable genetics while still staying modern and relevant, but also provide a service to our customers that lasts year round, not just the day you buy the bull. After a volatile and erratic cattle market this year, we had an outpouring of calls from customers looking for options on marketing their calf crop. Like all things that involve a buyer and a seller, it's hard to find common ground where both parties leave satisfied and even more important, profitable. In response, we launched a unique, innovative and fresh way for only TD Angus customers to market their calves through the TD Feed Test. With our partnership with Olson Farms, Dayna's family, we added \$25,000 added money in 5 different categories: Average Daily Gain, Feed Conversion- Efficiency, Highest Yield, Highest Prime Percentage and Highest Certified Angus Beef Percentage. In total, we marketed over 4,000 cattle through the test and every head not only returned invaluable results, but every pen had a chance to make money, some with profits over \$200 per head. Of all cattle marketed through the feed test they ran an incredible 99% choice and prime. With premiums at \$4 per cwt for CAB and \$8 per cwt for prime grades, this is an unprecedented value to our customers. After 50 years of offering elite Angus genetics to the industry, we knew these cattle would perform on the ranch and in the feedlot, but now we have proof.

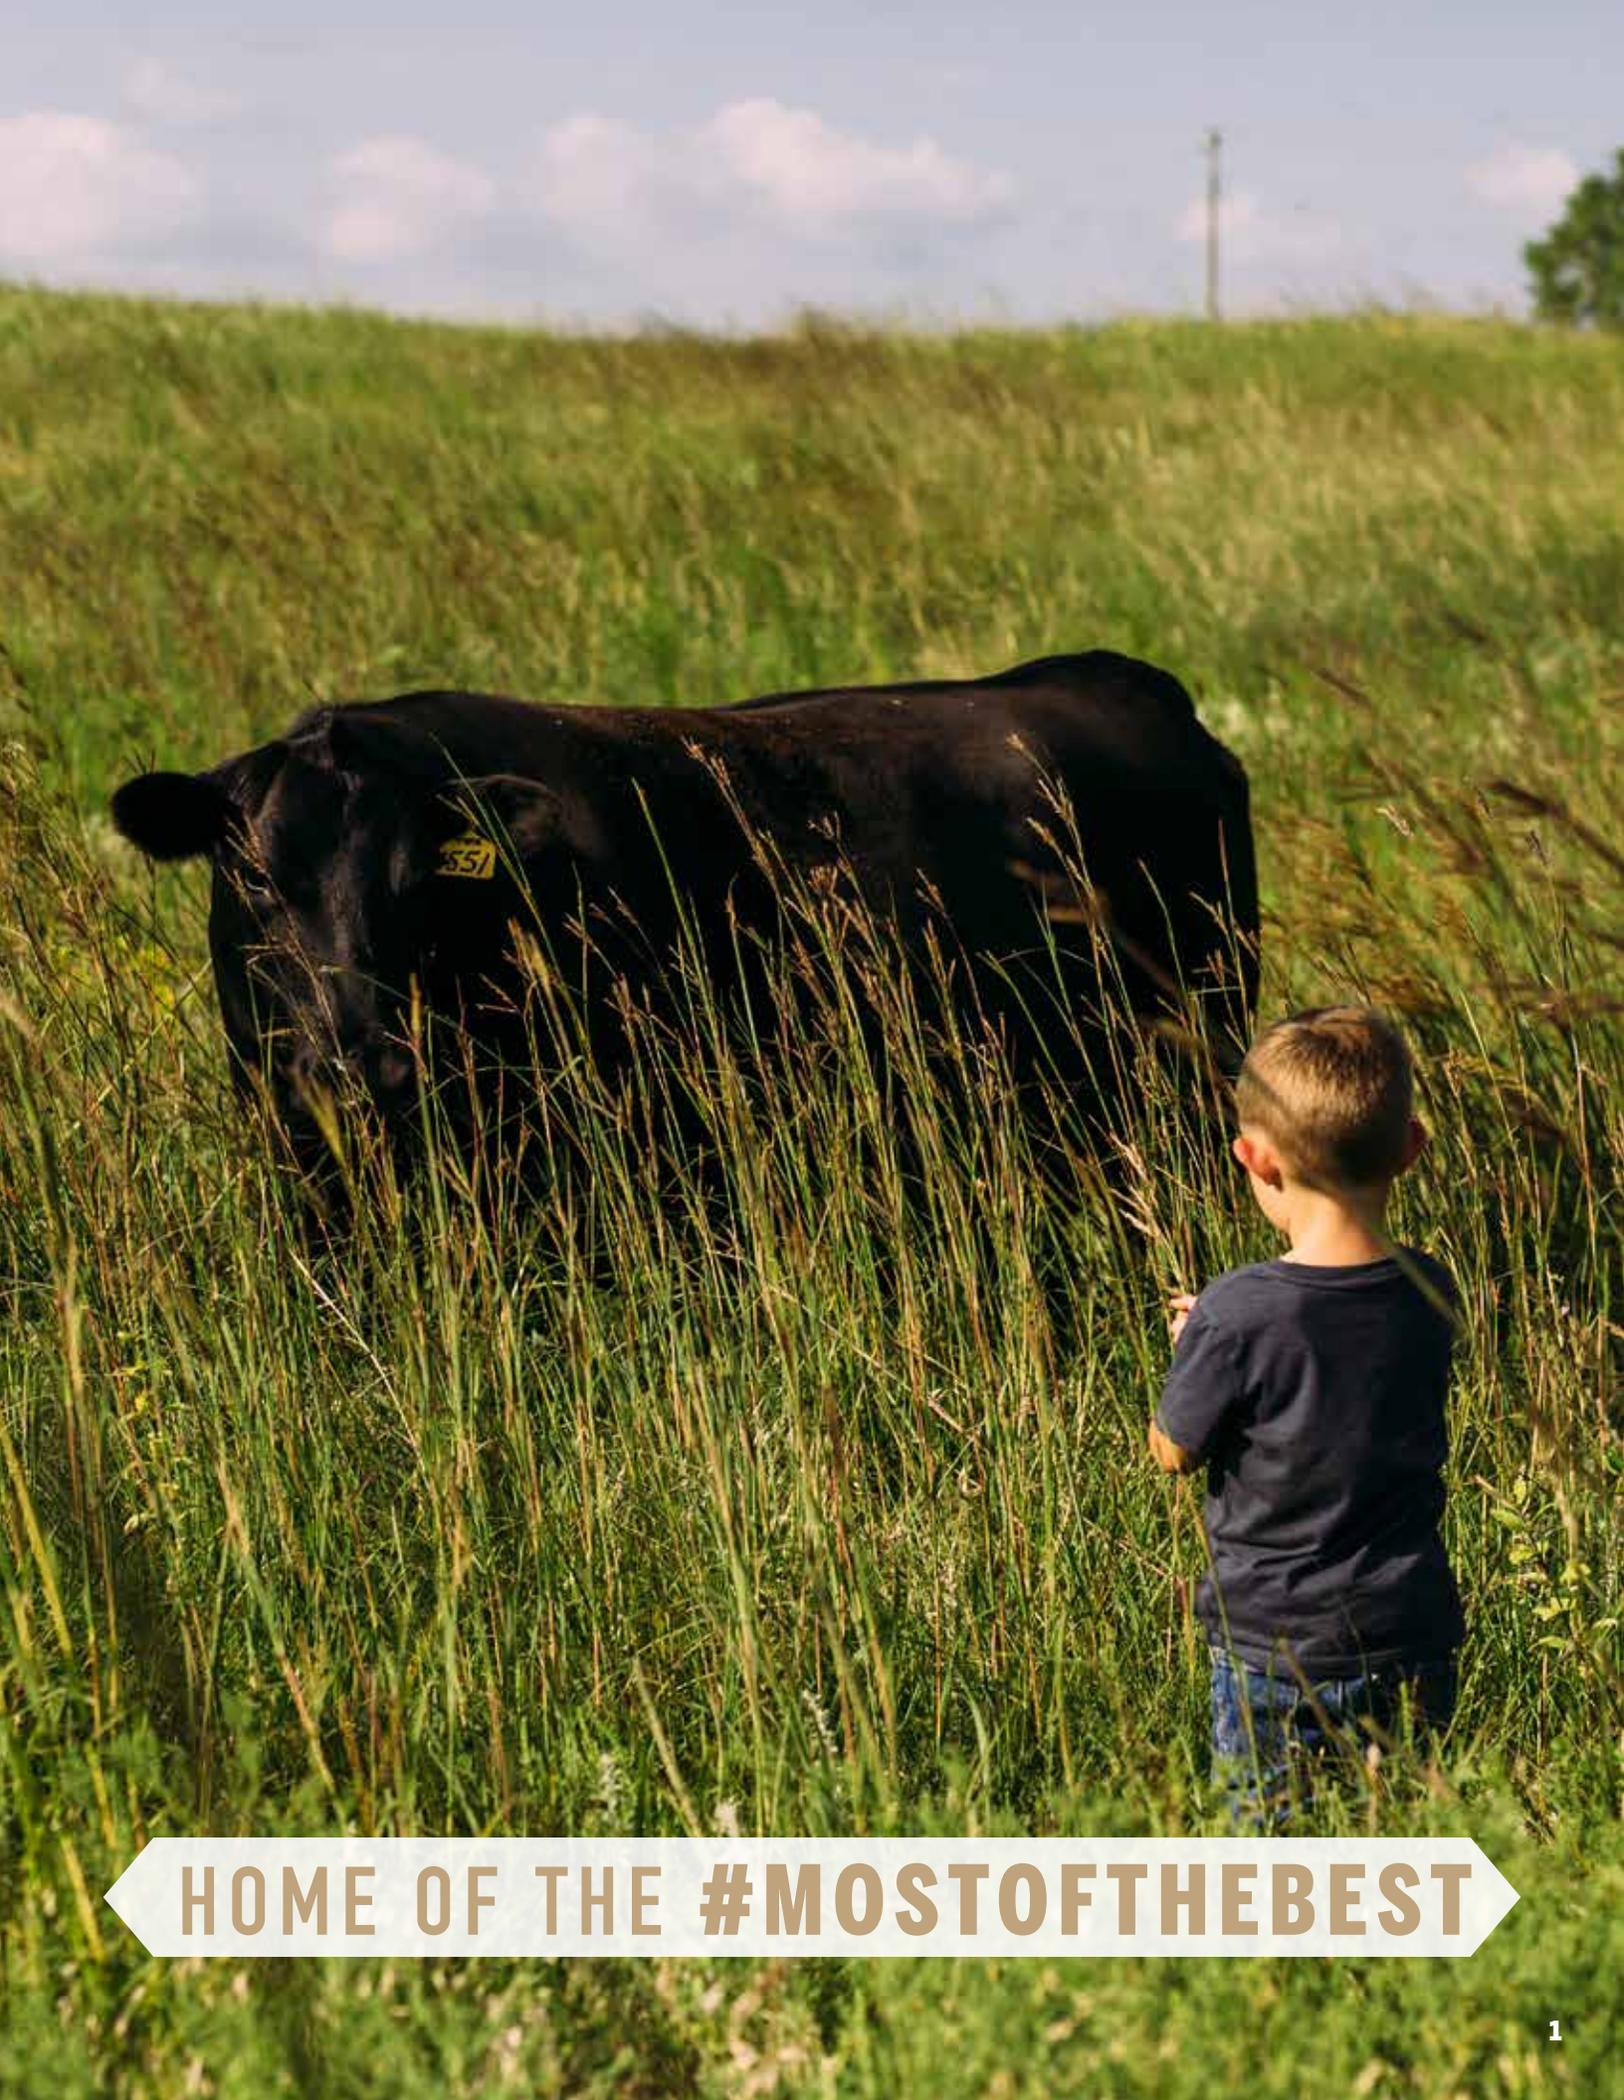

We are going to offer the feed test to TD Angus customers every year and with over 2,000 head on feed for next year's test and it looks like this is only the beginning. Winners will be announced and checks will be presented before the start of the bull sale. At TD Angus you don't just buy the bull, you buy the program. Join us March 20th at Rishel Ranch for not only the largest offering to date, but our #mostofthebest as well.

CAN'T MAKE IT? Buy with confidence on sale day! A TD Angus representative will buy on your behalf, within your budget, and we guarantee your satisfaction upon delivery.

ONLINE BIDDING The sale will be broadcast live on DVAuction.com and LiveAuctions.tv. Please register at least 24 hours in advance of the sale.

VOLUME DISCOUNTS
5% discount: 5-9 bulls purchased
10% discount: 10 or more bulls purchased

DELIVERY Free delivery to any state in the continental United States. Haul your own bulls sale day and we'll deduct \$100/bull. Our goal is to complete all deliveries by May 15. Buyers cooperation in this regard is greatly appreciated. Contact Trey when you brand your calves and he will bring your bulls with him. It gives him an opportunity to view the calf crop and understand your program and its goals with more clarity and direction.

FERTILITY & BVD TESTED All Angus bulls selling have been fertility and BVD tested and scrotal measurements were taken by Dr. Kevan Albertson, Stockman's Vet Clinic, North Platte, NE.

GENOMIC TESTING
All of our cattle have been genomically tested using AngusGS powered by Neogen GeneSeek. **ANGUSGS**

RETAINED INTEREST TD Angus will retain 1/3 revenue-sharing semen interest in all bulls selling. The buyer has full possession and 100% of the salvage value of the bull. Should we want semen on any bull selling in the sale, semen for our use would be collected in the off-breeding season at your convenience and at our expense.

ULTRASOUND DATA Samantha England performed all Angus ultrasound work.

LIABILITIES All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

SUPPLEMENT SHEET A supplement sheet will be available with complete and up-to-date information on sale day and will be posted online at TDAngus.com.

GUARANTEE All bulls are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 60-day period following the first turnout of the bulls. Please notify us as soon as possible when an injury occurs and prior to the injured bull being sold for salvage. Credit for the amount of purchase less the salvage value will be given in next year's bull sale. This guarantee does not include death loss. Mortality insurance available sale day.

ANGUS BULL BUYER'S REFERENCE

We want to simplify bull-buying decisions for our customers. We try to present data that we believe has great economic merit and do it in a form that is easy to read and understand.

birth traits

CED – A higher number, more calving ease.
BW – A lower number, a smaller calf.
Act BW – Ratioed and incorporated into the EPD.

INDUSTRY TREND – Greater numbers of Angus sires are reaching extremely high CED and low BW EPD values, largely due to highly heritable shorter gestation lengths. We do not see it as a positive trend when calves become too small at birth. In addition, none of these birth traits measures calf vigor of a sire's progeny and mothering ability of the cow line. We do that for you.

- Hfrs
- Cows

OUR RECOMMENDATION for bulls to use on heifers is based on a combination of CED being +6 or greater and BW being +2 or less. We also look at the birth weight history of the bull's mother and cow family and the use of genomic markers and may adjust our recommendation accordingly. Using these criteria, we cannot recall the last time we have had a customer complaint with a calving difficulty problem.

| <input checked="" type="checkbox"/> Cows | 85 | 631 | 1124 | 14.8 | 4 | 25 | 51 | 138 | 246 |

Combines two great cows in the program. This guy's an absolute tank. They don't make them any stouter with added mass and added volume in a complete sound package. He reminds us a lot of his sire, "Nationwide" more than any other calf we have ever raised. %IMF(126) Top: 2% WW, 10% YW, 2% SC, 30% Doc, 15% HP, 10% CW, 30% MB, 20% \$M, 3% \$W.

performance traits

205 wt. – weight adjusted for age of dam to 205 days, ratioed in contemporary group and incorporated into WW EPD.

365 wt. – weight adjusted to 365 days, ratioed in contemporary group and incorporated into YW EPD.

INDUSTRY TREND – The industry is fascinated with chasing extremes of WW EPD and YW EPD to the top percentiles of the breed, and selection pressure will move them higher. Long-time customers that retain ownership through the feedlot have no problem producing 1450#-1500# pay weight steers from bulls that range from +94 (top 55%) to +126 (top 10%) of the breed. We believe this selection criteria will help us and our customers control cow size and cow maintenance requirements and therefore cow herd costs.

feed efficiency traits

RADG – expressed in pounds per day, this is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed. A higher number is more favorable.

DMI – expressed in pounds per day, this is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires. A lower number is more favorable.

INDUSTRY TREND – A search of the sire summary reveals major differences in sires in their combination of RADG and DMI. Some high-\$B sires have a desirable combination of high RADG and low DMI, while many others are upside down. It appears to be quite genetic and we have been utilizing it for several years in sire selection, not only for feedlot efficiency for customers who feed cattle, but for related cow efficiency for all customers.

maternal traits

CEM – difference in percentage of unassisted births in a bull's daughters as first-calf heifers. A higher number is more favorable.

HP – selection tool to increase probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season.

MILK – predictor of a sire's genetic merit for milk in his daughters; it is part of a calf's weaning weight attributed to milk and mothering ability.

DOC – predictor of temperament and behavior of a sire's progeny.

INDUSTRY TREND – We believe that CEM is one of the most overlooked and underutilized values we have in our selection tool box. We believe that a less stressful unassisted birth in a first-calf heifer helps her be a better mother and allows her to recycle sooner, giving her a better chance of staying in the program for a lifetime of production. This is a major economic impact, considering the cost of heifer development. Similarly, HP has economic impact as well. It is a number we want to know more about, but we have been making an effort to use sires that excel with very positive numbers. When it comes to "milk," we have positioned our herd away from the extremes. We want our cows to milk enough to raise a big calf and not so much that it becomes a liability to reproduction and cow maintenance and to adapt quite well to a vast majority of the environment and resources of many of our customers' programs. The DOC EPD certainly has value as a convenience trait, but also has great economic merit in terms of how cattle perform and function. Higher levels of docility can improve conception rates in A.I. programs and will definitely improve performance in the feedlot.

OUR RECOMMENDATION – We believe these four traits (CEM, HP, Milk, DOC) have a great deal to do with maintaining a cow herd that has both reproductive efficiency and stayability which combined, lead to greater longevity. When a cow stays in the herd long enough to cover the cost of putting her in production, she becomes more profitable to the operation each year thereafter. It is the single biggest economic factor of profitability to the bottom line of a cow/calf operation.

carcass traits

Ultrasound – Phenotypic data taken with an ultrasound machine that is incorporated along with genomic markers for carcass merit into the carcass EPDs.

EPDs – The carcass EPDs are the ultimate selection tool for carcass merit.

value indexes

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M) – expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W) – is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F) – is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

Grid Value (\$G) – is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B) – is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires. **\$B does not include any prediction of fertility, maternal value or stayability in the cow herd. It is a terminal post weaning and end product economic value.**

Combined Value (\$C) – an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

FEEDER CALF BUY BACK PROGRAM

Trey Wasserburger 307-660-8650
 Bill Rishel 308-530-7999

Here at TD Angus we recognize and appreciate the genetic value these cattle have and most importantly how they can perform in the feedyard, specifically on the grid evaluation. As the seedstock producer, we believe our job does not end when the bull leaves the ranch and our commitment to our customer continues from the pasture to the plate. As in past years, we would continue to encourage our customers to contact us at anytime when they decide to market their calf crop so we can assist as representatives or most importantly as potential buyers. There is no fee or any hidden commissions to enter this program, we don't need to run them through a chute or put a special tag in their ear to estimate or understand their value. Any weight, any sex, at any time of year we are continually looking for cattle that fulfill the "most of the best" in the feedyard or as replacement heifers. Feel free to contact us at any time.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand. Only 3 in 10 non-parent Angus bulls meet the Targeting the Brand genetic requirements.

Minimum Genetic Requirements

| <i>Minimum Genetic Requirements</i> | <i>Value</i> |
|-------------------------------------|--------------|
| Marbling EPD (Marb) | +0.54 |
| Dollar Grid Carcass Index (\$G) | +46.0 |

Fall Bulls

MANAGEMENT PROGRAM

Longevity and durability are a must here at TD Angus. To ensure that, we managed the fall bulls differently this year. From May through September the fall bulls were run on Sandhill grass. These bulls will be called to work from the desert of the Great Basin, the grasslands and mountains throughout the Midwest clear to the fescue of the Southeast, so that's how we developed them, on as natural of environment as we could. Sept 1st the bulls were brought in and scanned for ultrasound data and a yearling weight was taken. The bulls were then kicked back out into a section pasture from Sept until the snow flew in November. Since then they have been on a high roughage diet. These bulls have not been pushed in any manor whatsoever. We cannot tell you how happy we are with the way these bulls have been managed and performed at such a high level. The quality has never been better and the hoops they had to jump through to get here have never been more rigid. These bulls have never been more ready to go out and breed cows anywhere in the nation. Guaranteed.

LOTS 1-3 FLUSH BROTHERS

Two of the most powerful cows in "1551" and "3210" on the place stacked into one pedigree. This mating was a dream on phenotype. The donor "3210" is always a visitor favorite and recently sold a flush to Musgrave Angus as their pick of the herd. The only daughter out of this flush has a set of impressive ratios at WW@109, YW@106, IMF@105 and RE@119. We think these bulls have herd bulls written all over them.

"Nationwide" was the show stopping \$110,000 top selling bull in our 2017 sale. He was truly unique and exhibits a multitude of superior traits of economic value for the industry. The legacy of his mother, the incredible "1551", continues to grow with each calf crop and notable cattlemen from around the country have described her as one of the most powerful Angus cows they have seen. Due to his untimely death his semen was only available in the owners' herds. This is a great opportunity for Angus breeders across the country to acquire "Nationwide" sons in their program. We couldn't be more excited about the progeny of this young and powerful sire.

This highly proven TD Angus herd sire has been the top selling sire group for the past three years with the \$100,000 B/R Nationwide 69 in 2017 to a premier group of Angus breeders including Knox Bros, San Angelo, TX; Hoffman Ranch, Thedford, NE; Peterson Angus, Alcester, SD; Rancho Casino, Denair, CA; Dal Porto Angus, Oakley, CA; Teixeira Angus, Pismo Beach, CA; Booth Family Angus, Torrington, WY; and Express Ranches, Yukon, OK and his \$60,000 flush sister to topping the female division to Knox Bros. In 2018 the "Cavalry's" swept the ring again with the \$30,000 T/D Attila 711 to Knox Bros, his \$28,000 flush sister

to the good cattlemen Jerry Adamson of Rockin J Ranch and KTO Inc. and 23 sons averaging \$8706. Last year in the 2019 bull sale, T/D Tiger 8106 was sired out of a daughter or none other than Cavalry and was the high selling bull at \$30,000 to Jocko Valley of Arlee, MT. These sons and daughters have made a statement in some of the most respected programs across the nation as these cattlemen rave about the tremendous flesh, soundness, fertility and breeding ability of the "Cavalry" sons and incredible motherly demeanor and beautiful udder quality of his daughters. As of today he has 47 daughters in production with a nursing ratio of 104.

LOTS 6-10 FLUSH BROTHERS

The last flush to sell out of the longtime donor, "9010", who passed last summer. Immense capacity and volume in this fantastic set of flush brothers that will sire heavy feeder cattle and beautiful females. The "9010" daughters in production are beautiful uddered, raise big calves and always maintain a consistent calving interval. She has an impressive IMF ratio of 25IMF@105 and this set of brothers averaged a IMF ratio of 109 as a flush.

LOTS 11-12 FLUSH BROTHERS

What a neat flush here. These could be the stoutest and heaviest boned "Cavalrys" we have ever created. The mother of the \$22,500 top-selling fall bull to ABS in 2017, B/R Compadre. Their grandam was the donor dam of Lots 35, 36, 37 and 38 in 2016 to Doug Snyder (\$8,000), Knox Bros (\$18,000), Mark Rose (\$15,000) and Tom Beal (\$16,000). Other sons were featured in 2015 as Lots 96, 97 and 98, selling to Elwood Ranch (\$12,500), Tom Walz (\$10,250) and Bar T Bar and Quarter Circle H (\$13,500). The third cow in their pedigree is the mother of the "Right Cross 70024" herd bull. A proven pedigree combined with most consistent sire ever on the ranch in "Cavalry" was sure to be a genetic explosion. They have been a visitor favorite all year.

Exciting new sire group to offer at TD Angus who ranks #1 on the main sire list for \$C, the new combined value index. Excellent calving ease and the calves are as vigorous as we've ever seen at birth while being 1% of the breed for marbling, yearling weight and hot carcass weight. Many are just now starting to breed to Enhance, to have a sire group of aged bulls is a rarity and will not be offered anywhere else this sale season. Be on the front end to own the first 18 month old sons to sell in the country.

LOTS 16-17 FLUSH BROTHERS

Powerful set of flush brothers that have garnered a lot of attention. Most people are just starting to breed to Sydgen Enhance 5209 so to have a set of age advantaged flush brothers is a rarity. Lots more to come from this sire. Out of a high producing cow with a record of 2WWR@121, 2YWR@116 and an impressive scan record of 52IMF@102 and 52RE@102. Four maternal brothers by "Cowboy Up" sold to Lynn Flaming for an average of \$8,000 in 2019.

An exciting new sire group here from our friends Dave and Carol Medeiros. Bomber sold to Vermillion Ranch for a record \$190,000 in the Fall of 2017 and is one of the heaviest used sires in the breed the past couple years. We've loved the balance and type of this bull from the first day we saw him and every year we revisit him and he seems to get even better with age. His sons have tremendous value to the industry possessing great length of body, soundness and weigh heavy at weaning and at a year. Most of the best here.

Another powerful individual with tons of mass and volume and a royal pedigree. The "In Focus" daughters have been some of our favorite 2 year olds in the program. They are easy fleshing, beautiful uddered and very maternal. Flush brother to Lot 31. These flush brothers will make replacement heifers that will make lasting and sustainable females. %IMF(104), RE(106). Top: 10% WW, 15% YW, 25% SC, 20% Doc, 25% CEM, 20% \$W, 205(108), 365(103).

LOTS 31-32 FLUSH BROTHERS

A powerful set of flush brothers out of the famed "1421" cow and the female maker, In Focus 4925. A full sibling that was a grade 3 embryo and was unable to freeze. She was put in fresh into a recipient cow and was born in May and then was thrown into the spring replacement heifers where she bred to the first shot of AI and calved at 20 months of age. Fertility and consistency run in this family.

First time sire group out of a proven bull that has an 15 EPDS in the top 10%. We decided to use the bull after taking a trip to Missouri and seeing stout sons and powerful daughters in production by Power Surge. His calves have not disappointed us, as he sired some of the heaviest weaning bull and heifer calves this year. His sons show tremendous length of body, muscle and dimension and will add pounds and carcass traits to a calf crop.

This high volume, easy fleshing individual is one of the bulls that cattlemen come to see. Few calving-ease bulls in Angus history have ever offered the extreme body mass and depth of body that is a trademark of Payweight 1682 and his progeny. The 1682 daughters that we have production in our program display his depth of body and ease of fleshing with beautiful udders and proving to be very good mothers. Some of our favorite calves are out of 1682 daughters and we have daughters in the exclusive Embryo transfer program already.

Compadre was the high selling Fall bull of the 2017 sale to ABS Global. Compadre has a balanced EPD profile with calving ease, bone and substance and added length of body. His mother is very productive cow with a calving interval of 4 @362 days while being flushed annually. She calved in January again this year qualifying her as a pathfinder, like her mother.

In the spring of 2017, we looked for a bull to follow the A.I. on the best set replacement heifers in the history of the program. We gave \$44,500 for the Triple L / Spring Cove sire, Spring Cove TL "Cat" D13, top selling bull of their 2017 sale. The soundness, power, libido and semen producing ability of this sire is exceptional. We really like this mother and her udder is superb. To top it off he has excelled as a calving ease sire with muscle.

LOTS 68-69 FLUSH BROTHERS

Timeless genetics on offer. These 4 embryos were sitting in the tank and we put them in to make females and in true cattle business karma, we got two bulls. Fans of the program will recognize that these two flush brothers would be maternal brothers to the famous Pride cow family, "1551", "1421" and "1521". If you want to make a lasting set of replacement heifers that will stand the test of time, like their maternal sisters, these brothers need owning.

| 16 | 64 | 0.37 | 0.57 | 0.012 | 72 | 105 | 40 | 145 |

This highly proven TD Angus herd sire has been the top selling sire group for the past three years with the \$110,000 B/R Nationwide 69 in 2017 to a premier group of Angus breeders including Knox Bros, San Angelo, TX; Hoffman Ranch, Thedford, NE; Peterson Angus, Alcester, SD; Rancho Casino, Denair, CA; Dal Porto Angus, Oakley, CA; Teixeira Angus, Pismo Beach, CA; Booth Family Angus, Torrington, WY; and Express Ranches, Yukon, OK and his \$60,000 flush sister to topping the female division to Knox Bros. In 2018 the "Cavalry's" swept the ring again with the \$30,000 T/D Attila 711 to Knox Bros, his \$28,000 flush sister

to the good cattlemen Jerry Adamson of Rockin J Ranch and KTO Inc. and 23 sons averaging \$8706. Last year in the 2019 bull sale, T/D Tiger 8106 was sired out of a daughter or none other than Cavalry and was the high selling bull at \$30,000 to Jocko Valley of Arlee, MT. These sons and daughters have made a statement in some of the most respected programs across the nation as these cattlemen rave about the tremendous flesh, soundness, fertility and breeding ability of the "Cavalry" sons and incredible motherly demeanor and beautiful udder quality of his daughters. As of today he has 47 daughters in production with a nursing ratio of 104.

LOT 84

LOT 85

LOTS 84-85 FLUSH BROTHERS

One of our favorite flushes and a visitor favorites all year. Full sister was the \$16,000 Lot 8177 that sold in 2019 to acclaimed cattleman, Jerry Adamson. Jerry reported that she caught to the AI first try and calved this spring and has a perfect udder, incredible fleshing ability and has the making of a mother cow. This flush is also a full sister in blood to the \$60,000 B/R Pride 618 and the \$110,000 B/R Nationwide. His dam, "1421", produced the powerful \$25,000 B/R Demand 628 in the Dikoff Dispersal in 2017 and is one of the "Three Prides" at TD Angus along with "1551" and "1521".

LOTS 88-90 FLUSH BROTHERS

First flush ever offered by the high producing cow, B/R Lady Ida 328. She earned her way into the donor pen the old fashioned way, through data and performance. She has an ACI of 4 calves @ 366 days and 4BWR2@100, 4WWR@103, 4YWR@108, 8IMF@108 and 8RE@110. We can't express to how good this cow is. Her natural calf in 2017, a full sibling heifer to these bulls, ratioed an impressive WW(115) AND YW(119). She would be our pick of a deep set of bred heifers and was flushed as a first calf heifer. This is a cow family that is paving the way into breed excellence and needs paying attention too. This set of flush brothers has as much volume and rib as any bulls in the breed and as proof of their full sister in production, will make phenomenal females.

Out of a first calf heifer. Grandam's ACI 3 calves @ 379 days. Top: 4% WW, 15% YW, 10% SC, 25% MB, 10% \$W. 205(107), %IMF(104).

LOTS 104-110 FLUSH BROTHERS

Incredible performance and growth in this big flush of "Cavalry" brothers. This cow now calls TD Angus home after passing the enduring tests to be a donor in this program with an impressive progeny record of 2WW@121, 2YW@116, 52IMF@102 and 52RE@102. A full sister to this set of flush brothers just weaned off a bull calf in the fall that weighed heavy and has a beautiful udder and disposition. Enough performance and growth to make an outstanding set of feeder cattle, but enough maternal power to make replacement heifers all in one package. The steers out of these flush brothers could be contenders for every category in the TD Feed Test. Flush sisters sell as Lots 305-308.

TD ANGUS
 at Rishel Ranch

LOTS 111-113 FLUSH BROTHERS

An powerful set of flush brothers backed by a proven cow family. The donor dam was the \$11,000 feature in the 2014 Riley Bros Sale and a maternal sister to the \$10,000 top-selling heifer calf in 2012. Her dam, RB Lady Standard 305-02 is quickly recognized by Angus enthusiasts as a full sister to the legendary National Western Foundation Female Sale, \$170,000 record-seller, RB Lady Standard 305-890, who now has three sons in AI studs plus the high indexing bull in the 2013 Midland Bull Test Station. She boasts an enviable EPD spread, a \$W in the top 2% and \$B value in the top 3%.

"Nationwide" was the show stopping \$110,000 top selling bull in our 2017 sale. He was truly unique and exhibits a multitude of superior traits of economic value for the industry. The legacy of his mother, the incredible "1551", continues to grow with each calf crop and notable cattlemen from around the country have described her as one of the most powerful Angus cows they have seen. Due to his untimely death, his semen was only available in the owners' herds. This is a great opportunity for Angus breeders across the country to acquire "Nationwide" sons in their program. We couldn't be more excited about the progeny of this young and powerful sire.

LOT 121

LOT 122

LOTS 121-122 FLUSH BROTHERS

Two power cow families meeting in one pedigree. With the untimely passing of B/R Nationwide 69, a very select set of cows got the privilege of being flushed to him and "2207" met the criteria. She has the enate ability to pass on more bone, substance and foot than any other cow on the place. "2207" is the dam of the ABS Global sire, B/R Compadre 5201. Flush sister will be a sale highlight in the female sale as Lot 300 with ratios of 205(103), 365(106), %IMF(102), RE(101).

LOT 125

B/R Ruby of Tiffany 226 – Dam of Lots 125, 301-302

B/R Ruby of Tiffany 226, Reg #17189684: Power met maternal excellence in this flush. With the sudden death of the record selling B/R Nationwide 69, only a select number of females were chosen to flush to him and “226” was the front of the list. “226” is quickly becoming a legend in her own right as the mother to the new donor, “556” (dam of Lots 4 & 21) and is showing up as the grandam on great cattle all over the ranch. With only one bull out of a flush of seven, here is your only opportunity at a son of a legendary flush where we will see his sisters produce on the ranch for years to come. Two flush sisters will lead off the female sale as Lots 301 and 302 and since we lost “226” this summer, here is a chance to own a part of her last flush.

Tremendous volume and capacity. Maternal brother to Lot 653 heifer out of the “226” donor sold for \$11,000 in 2017 to Earl Enix. Flush sisters sell as Lots 301 and 302. Top: 10% CED, 20% BW, 25% YW, 30% RADG, 4% SC, 15% HP, 15% CEM, 20% Milk, 10% CW, 30% RE, 10% \$F, 15% \$B, 20% \$W, 30% \$G. %IMF(106).

DELIVERY Free delivery to any state in the continental United States. Haul your own bulls sale day and we’ll deduct \$100/bull. Our goal is to complete all deliveries by May 15. Buyers cooperation in this regard is greatly appreciated. Contact Trey when you brand your calves and he will bring your bulls with him. It gives him an opportunity to view the calf crop and understand your program and its goals with more clarity and direction.

First time sire group of the high-selling bull from our 2018 bull sale, Attila 711 who sold to Knox Bros for \$30,000. He is one of the most powerful sons of Cavalry V3326 that we have ever raised. In comparison to the Cavalry sons, they show a little more frame and growth with added marbling and ribeye. His mother was a productive female who always bred early and raised a big calf with an ideal udder. We are excited about this first offering from this young and upcoming sire.

LOTS 127-129 FLUSH BROTHERS Awesome mating of maternal royalty and cutting edge genetics here. Out of the \$30,000 high-selling bull T/D Attila 711 and full brother to the \$28,000 top selling yearling heifer, "Nita" in 2018. Their dam, "3254", is the mother of the ST genetics sire, B/R MVP 5247. It would be hard to find a pedigree with that much cow power and consistency as these flush brothers. "3254" has an ACI of 4 calves @ 400 days while being flushed regularly and 2BWR@97, 2WWR@107, 2YWR@106 and 12IMF@100. These bulls will sire a tremendous set of feeder cattle that will do it all on the TD Feed Test and a set of replacement heifers that will rival the best.

Bonus 4345 is the sire of our \$44,500 herd bull, Spring Cove Cat D13. We used this bull specifically to flush to the most powerful cow we have, 1551 and the result was spectacular. Bonus 4345 has sired sons that have brought \$45,000 and \$58,000 respectively and after reviewing this set of flush brothers it is no secret why.

LOTS 142-146 FLUSH BROTHERS

Collectively as a flush, this produced some of the longest bodied cattle we have ever seen. This was a special mating between the famed "1551" cow and Basin Bonus 4345. After seeing the "Bonus" progeny, including wet daughters raising tremendous calves all over the country, we knew this mating could be a breed changer and we could not be happier with the results. Dam's record: 5WWR@110, 5YWR@111, 38@104, 38@101.

No other sire was as well received as the Playbook sons at our 2019 bull sale. They are as consistent of a sire group as we have ever had at the ranch. Sons are deep bodied, structurally correct, have exceptional eye appeal and very gentle. The first Playbook daughters in production have a very quiet demeanor, extremely easy fleshing and are good uddered. After the release of the new \$ Index by the American Angus Association, Playbook ranks in the top 1% of \$maternal. We sold the pick of our Playbook daughters in the Diamond Select Sale at the American Angus Convention to Huwa Cattle Co for \$24,000 in 2018. The genetic value his daughters will add to a cow herd is invaluable.

LOTS 149-151 FLUSH BROTHERS

This mating is the result of two prominent programs in one pedigree. We added our herd sire, Playbook 5437 and added the mother of herd sire, Spring Cove TL Cat D13 and made a stout and big bodied set of bulls. One of the youngest flushes in the sale, these bulls had no trouble not only catching up, but also catching our attention all year. Both sisters in the flush were retained as replacement females. TD/Rishel and Spring Cove/TL royalty in one pedigree here.

When we think of the "Most of the Best" this is the bull that comes to mind. One of the most exciting sire groups in the nation. Last year was the first year to offer this sire group and the sons averaged \$6678 and the heifers averaged \$15,200. No other "1682" son in the breed has his ability to make high quality semen in volume, under a perfect foot with 17 EPDs in the top 20% of the breed. His mother and grandmother represent one of the best cow families at the ranch. Our first MVP daughters in production arrived this spring and look flawless and right for the industry. He was one of our heaviest used sires last year and will continue to be this year.

In the spring of 2017, we looked for a bull to follow the A.I. on the best set replacement heifers in the history of the program. We gave \$44,500 for the Triple L / Spring Cove sire, Spring Cove TL "Cat" D13, top selling bull of their 2017 sale. The soundness, power, libido and semen producing ability of this sire is exceptional. We really like his mother and her udder is superb. To top it off, he has excelled as a calving ease sire with muscle. "Cat" was the sire of the high-selling \$30,000 T/D Tiger 8106 to Jocko Valley of Arlee, MT.

T/D Tiger 8106 – \$30,000 High Selling Paternal Brother to Lots 63-67, 168-177, 331-333

This high volume, easy fleshing individual is one of the bulls that cattlemen come to see. Few calving-ease bulls in Angus history have ever offered the extreme body mass and depth of body that is a trademark of Payweight 1682 and his progeny. The 1682 daughters that we have in production display his depth of body and ease of fleshing with beautiful udders and proving to be very good mothers. Some of our favorite calves are out of 1682 daughters and we have daughters in the exclusive embryo transfer program already.

LOTS 178-179 FLUSH BROTHERS

A "Payweight" sired flush with added bone and substance. Out of the mother of ABS Global sire, B/R Compadre 5201. These bulls will sire tremendous feeder cattle that will add pounds and power. With an average marbling EPD of 1.10 for the top 5% of the breed they will also grade with the best of them. Would love to see some calves sired by these bulls in the TD Feed Test.

An exciting new sire group here from our friends Dave and Carol Medeiros. Bomber sold to Vermillion Ranch for a record \$190,000 in the Fall of 2017 and is one of the heaviest used sires in the breed the past couple years. We've loved the balance and type of this bull from the first day we saw him and every year we revisit him and he seems to get even better with age. His sons have tremendous value to the industry possessing great length of body, soundness and weigh heavy at weaning and at a year. Most of the best here.

A new and exciting sire group here. Trey saw Southern Charm when he visited Origen in the Spring of 2018 and loved his fleshing ability, overall capacity and excellent feet. Sons of his look to possess that same phenotypic traits and with being in the top 10% of the breed for marbling and ribeye there is a lot of carcass value here as well.

One of the most overlooked bulls in the Angus breed. His daughters in production are incredibly fertile and calf raising machines. Highly proven bull in the industry with ratios of 103 for WW and 103 for YW with over 1800 progeny and his daughters are indexing 103. Multiple daughters sired by him will be the mothers to numerous bull in this sale. Our favorite bred heifer that calved this year is also sired by In Focus 4925. Few proven sires can match his moderate birthweight, growth, carcass merit and maternal value.

First time sire group out of a proven bull that has 15 EPDS in the top 10%. We decided to use the bull after taking a trip to Missouri and seeing stout sons and powerful daughters in production by Power Surge. His calves have not disappointed us, as he sired some of the heaviest weaning bull and heifer calves this year. His sons show tremendous length of body, muscle and dimension and will add pounds and carcass traits to a calf crop.

Reno progeny have been talked about throughout the nation for their wide base, moderate frame and fleshing ability. With an elite EPD profile with 15 traits being in the top 20% of the breed this sire covers a lot of bases. Reno daughters in production look like an ideal female with great fleshing ability and udders. Sons of his should sire the same.

Awesome bull with a ton of look and presence about him. Lots of capacity, clean sheathed. Calving ease. RE(103). Top: 30% CED, 30% BW, 15% WW, 4% YW, 10% RADG, 3% HP, 2% CEM, 20% Milk, 20% CW, 15% \$W, 205(110), 365(108).

LOTS 212-213 FLUSH BROTHERS

Modern mating here out of ST Genetics sire, Spring Cove Reno 4021 who is deceased and semen is selling for \$300-400 a unit out of a Pathfinder dam who has thirty daughters in production in herds all over the U.S. with a combined weaning ratio 52 @102. "905" sold a daughter at Foundation female sale in Denver for \$16,500 for half interest. Combining "905" with Reno's mother will be a lethal combination of replacement females. These sons will produce not only lasting and sustainable females but feeder cattle that will bring pounds in the fall. Maternal brother to Lots 117 and 118.

Neat sire group here. These sons were produced out of cows purchased from Vermilion Ranch in Billings, MT and all the cows had raised 6 calves with a calving interval under 400 days. They should sire sustainable, lasting females that will go to work for generations for our customers. Spur has sired the high selling sire group at Vermilion 3 years in a row and daughters in production are fertile, perfect uddered and have a gentle demeanor all without sacrificing growth and carcass traits.

Compadre was the high selling Fall bull of the 2017 sale to ABS Global. Compadre has a balanced EPD profile with calving ease, bone and substance and added length of body. His mother is very productive cow with a calving interval of 4 @362 days while being flushed annually. She calved in January again this year qualifying her as a pathfinder, like her mother.

A son of Garden Prime Star and out of a tremendous daughter of B/R Destination 727-928, he exhibits some amazing genetics. A rate individual in the top 10% of the breed for CED and YEPD. He has excellent heifer pregnancy and moderate milk which has helped his daughters prosper in the grasslands of Wyoming and will do the same in the Sandhills of Nebraska. He is in the top 1% of the breed for marbling and the top 5% for \$B. A very unique genetic piece for any program.

The STgenetics sire, "Treasure" has passed every test displaying over 1,700 progeny records for BW, and over 500 carcass ultrasound records, being tested in some of the breed's toughest contemporary groups. He consistently stamps his progeny with an attractive design, extra length and superior foot quality which he displays in this year's sire group, Lots 238-242. Treasure is the only sire in the main sire summary at his accuracy point to achieve his level of birth weight and growth.

LOTS 238-241 FLUSH BROTHERS

Flush brothers by Treasure out of a powerful and proven balanced trait leading donor. Third generation dam is a herd sire producing female, Miss Protege W148. The grandam is a full sister to the ABS Global AI sire, KCF Bennett Consent Y75 and AltaGenetics sire, KCF Bennett The Rock A473, is a maternal brother to their dam.

B/R Rito 3216 was the \$30,000 Lot 1 bull in our 2015 sale, selling to Agri Beef, Silveria Bros. and Watkins Angus. He is out of a full sister to B/R Destination 928-7222, and his grandam is the powerful B/R Ruby 1224, the mother of B/R New Day 454. There is a lot of power in the blood here. These cattle are extremely sound and structurally correct. They carry good length of body and worlds of volume.

This is a special offering from a great donor by the \$110,000 "Nationwide" sire in 2017 that exhibits a multitude of superior traits of economic value for the industry. She is super elegant with extra base width, long bodied, beautiful and sound at a walk and square out of her hip. She is the maternal sister to the B/R Compadre 5201, the \$22,500 top-selling fall bull to ABS in 2017. Seven sisters are retained in the program. Her grandam was the donor dam of Lots 35, 36, 37 and 38 in 2016 to Doug Snyder (\$8,000), Knox Bros (\$18,000), Mark Rose (\$15,000) and Tom Beal (\$16,000). Other sons were featured in 2015 as Lots 96, 97 and 98, selling to Elwood Ranch (\$12,500), Tom Walz (\$10,250) and Bar T Bar and Quarter Circle H (\$13,500). The third cow in this heifer's pedigree is the mother of the "Right Cross 70024" herd bull. Dam's record: ACI 4 calves @ 362 days, 4BWR@98, 4WWR@100, 4YWR@102, 15IMF@98, 15RE@105. Top: 15% WW, 15% YW, 20% RADG, 20% SC, 2% HP, 15% MB, 15% \$F, 5% \$B, 10% \$G. TD Angus will retain one flush.

TD ANGUS
at Rishel Ranch

We believe in a program where the cow herd should work for you, not the other way around.

COMMERCIAL HEIFERS

TD ANGUS
 *at Rishel Ranch*

LOT A (100 head) – Front end of the Flaming heifers, top end of over 300 and sorted to kind. These heifers would be daughters of Playbook and out of sons of Cavalry, Full Power and In Focus 4925. These heifers have been developed correctly and are easy fleshing and very gentle. Chance to buy the front end replacements out of a great cow herd. Located at TD Feed Test facility: Cow Camp Feedyard in Hershey, NE.

LOT B (100 head) – Front end of Flaming heifers, top end of over 300 and sorted to kind. These heifers would be daughters of Playbook and out of sons of Cavalry, Full Power and In Focus 4925. These heifers have been developed correctly and are easy fleshing and very gentle. Chance to buy the front end replacements out of a great cow herd. Located at TD Feed Test facility: Cow Camp Feedyard in Hershey, NE.

LOT C (99 head) – Steve and Debbi Blank- 99 head of fancy Angus replacements heifers out of powerful Cavalry sons. Front end of 300 head of heifers. Out of one of the best commercial cow herds in the nation. No brands. Would be an incredible cross to herd sire B/R MVP 5247. Fancy, fancy set. Could be the best set of replacement heifers to sell in the nation. #750. In Wilcox, NE. Delivery March 23-27.

LOT D (200 head) – Fancy set of replacement heifers. Front end of over 350. 130 head will be Angus and 70 head will be BWF. Originally the Conrad Lobner heifers. Years and years of TD and Rishel genetics. Lots of New Design and Destination bloodlines. Very gentle heifers that will mature to a be moderate and easy keeping females. Located at Brennan Growyard in Overton, NE.

ranch broke geldings

CATS IRISH COFFEE AQHA #5599778

DOB
1/20/2014

**BAY
GELDING**

As stout and as good looking a gelding as we've ever had. Purchased as a yearling on recommendation by good horseman and cattleman Larry Rice. Out of NCHA money earner Little Cat Olena and out of an own daughter of NCHA Hall of Famer Paddys Irish Whiskey. This gelding is as good a horse as we've ever sold. Gentle, tons of shape and bone and been used extensively the past couple years on a ranch. Trey used him as his head mount for ranch rodeos. Started out of the box roping. Everyone that sees this horse loves him. A once in a lifetime gelding. For more information, call Jeremy Knoles at 806-330-1701.

**DUN
GELDING**

Stout gelding that has a ton of shape, bone and foot. Raised by the Haythorn Ranch, this gelding is built the way ranch geldings are supposed too with a modern cutting pedigree. His sire, son of NCHA Hall of Famer Playgun, PG Shogun was one of the brokest horses I've ever seen under saddle. We have had the pleasure of owning three of his sons and they are all extremely gentle, strikingly gorgeous and with a ton of cow. This horse is a ton of fun to ranch on but is all horse. For more information, call Jeremy Knoles at 806-330-1701.

**GRAY
GELDING**

Beautiful dapple gray gelding that has been with us since he was a two year old. We used him here for a year doing all the ranch chores and then Andrew Wasserburger and Conor Dwyer took him for two years and used him in big Wyoming country and in a growyard. Roped a lot of cattle outside and drug a lot of calves. This horse has seen more miles than a highway patrol man. Shapey, wild colored, elite pedigree and has had a job. Been started roping out of the box. This horse is the real deal. For more information, call Jeremy Knoles at 806-330-1701.

JVC
CAVALRY
V3326

SIRE: Connealy Cavalry 1149 - DAM: Brusett Forever W857
MGS: TC Franklin 619

One of the most proven bulls being used in the Angus breed today. With a phenomenal progeny record with 706 birthweights reported with a ratio of 100, 602 progeny reported a weaning weight with a ratio of 103, 284 progeny reported for yearling weight for a ratio of 104. He is the sire of the TD Angus high-selling \$110,000 B/R Nationwide 69 and \$36,000 Attila. His sons are sale toppers, but his daughters make him a timeless bull with 47 daughters in production with an average nursing ratio of 104. Cavalry has produced daughters topping the female division at \$60,000 and \$30,000 at the TD Angus Bull and Female Sale and last year featured the \$30,000 T/D Tiger 8106, raised by a Cavalry daughter.

TD ANGUS
at Rishel Ranch

Exclusive is with one of the 316 sons Musgrave's have decided to use heavily. His flawless phenotypic package offers super foot structure with a massive, muscular presence. Use him to add power and performance to your cow herd.

REG: AAA 18130471 • DOB: 2/6/2015

We had the opportunity to acquire a portion of the bull while Bill was visiting Musgrave Angus and saw him at work on cows and he was thoroughly impressed. He is the highest \$B "316" son that offers exceptional docility, great feet and structure while still maintaining an EPD profile that ranks him as one of the top carcass sires in the breed. **Semen is available in conventional and sexed semen through ST Genetics.**
