AT THE RANCH — NORTH PLATTE, NEBRASKA — 12:30 PM CST

SELLING EVERY COW OVER FIVE YEARS OF AGE  
150 SPRING BRED COWS & HEIFERS, ET HEIFER CALVES, HEIFER PREGNANCIES AND RANCH BROKE HORSES

# *greetings cattlemen*

Welcome to our very first Fall Female Sale featuring our Mature Cow Dispersion. This is a historic day for the program. This was a hard decision for both Dayna and I and Bill and Barb Rishel, as well. They entrusted us with their legacy and a piece of that will leave today and that must not be taken lightly.

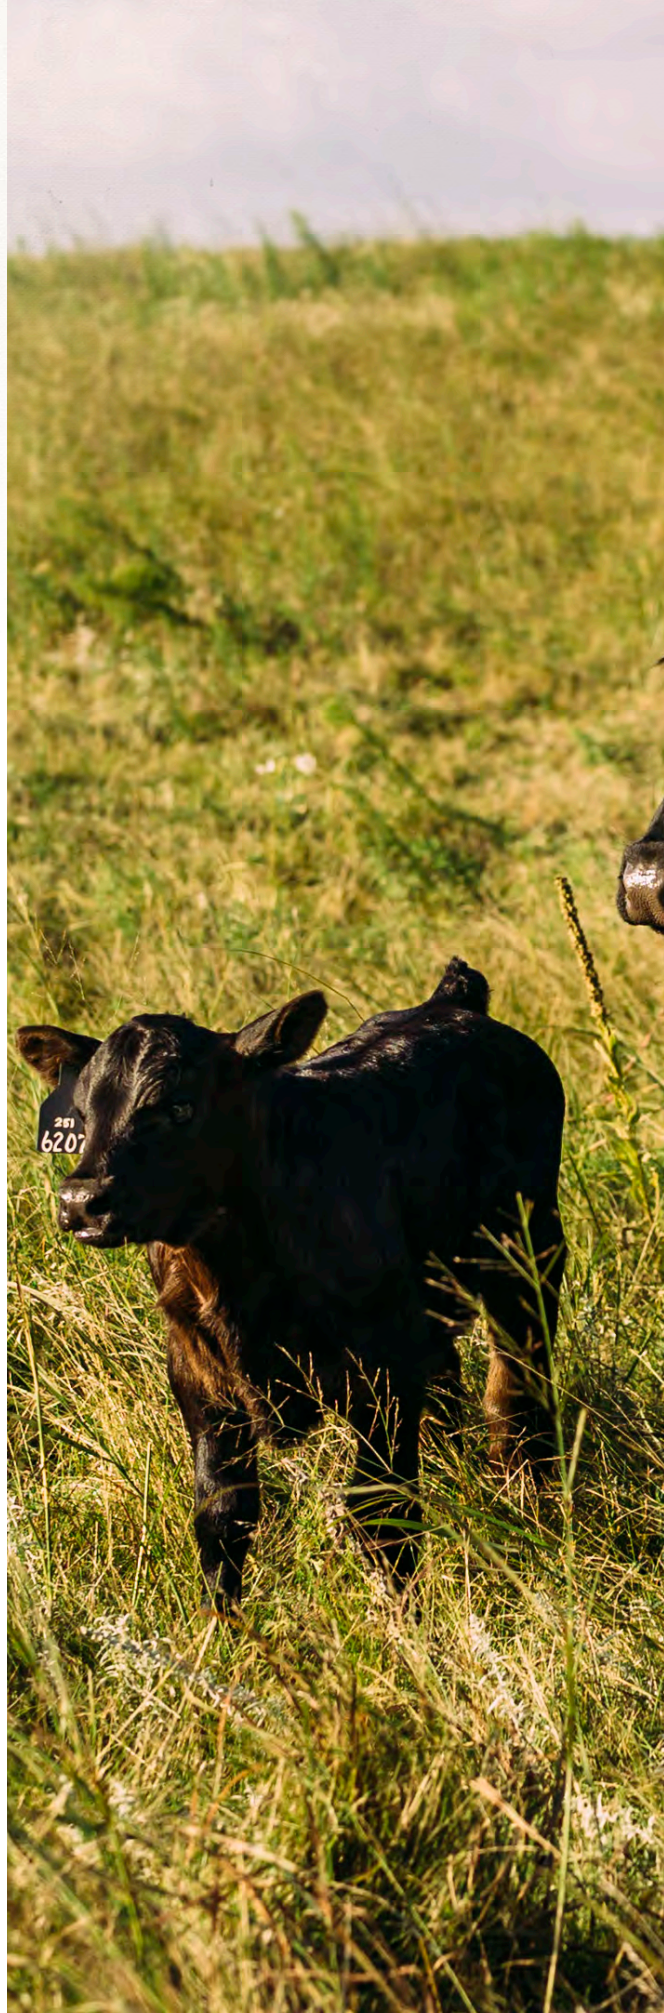

Since our purchase of the prominent and world famous Rishel Angus cow herd in 2017, under the advisement of Bill Rishel, we have taken the Angus business head on. We have invested back into our program with an extensive ET program in both the spring and fall herds putting in 300-400 embryos each year. It has not only grown our program for our commercial customer bull base, but also added depth and power of replacement heifers out of some of our highest producing cows. It also tripled our cow size in a short 4 years. The only setback to our model is sheer numbers and that is the only reason for this sale today.

When Dayna and I purchased this cow herd four short years ago, we had never owned a registered cow. I remember looking at the cow herd for the first time with Bill Rishel and being silent. He looked over and asked me, "What do you think?" I replied, "These cows make it look easy." A rarity in my life but for once, I was right. I had never seen anything like what this cow herd can do in this industry and still haven't. These cows are the easiest breeding, low maintenance cattle I have ever been around. They make the work so much easier. They calve by themselves, breed back and raise a heavy calf in the Sandhills while under a strict cull regimen and taking a low maintenance and light work load. Because of this cow herd, we have gone from never owning a registered cow to placing 350+ Angus bulls to some of the most prominent commercial ranches throughout the nation. Without the cow herd, the true core to our program, none of this would have been possible.

The cows in this sale were apart of the original herd we bought from Bill and Barb Rishel, every cow that is 5 years or older sells and many are bred to the \$525,000 high seller of this year's bull sale, T/D Doc Ryan 049. These will be the first calves sired by "Doc" and will be only ones in the country for sale. In that time, we have not only sold more bulls every year, but we have also increased our price average. The mothers of those bulls sell today. If they can do for their new owners what they did for this young family, we can honestly call them some of the most valuable cows in the industry. The proof is in the data, this program is working. What these cows have been able to do for us in a short amount of time is truly unprecedented in this industry.

We love this business. We have no plans of going anywhere or getting any smaller. These cows will be in the pedigrees of our cow herd for eternity and the new owners of these cows will be able to reap the benefits of being the mothers, grandmothers and great grandmothers of some of the most elite Angus herd bulls in America. Join us for a special day, at a special place, for a special reason. The #mostofthebest sell on November 11th at TD Angus at Rishel Ranch for our Mature Cow Dispersion.

*Trey & Dayna Wasserburger*  
Westyn, Gentry, Gwyn, and Wacey

# *words from Bill*

Welcome to the Mature Cow Dispersion for TD Angus at Rishel Ranch. The step-by-step transition of Rishel Angus to TD Angus has been a remarkable journey for Barb and me. It is one thing to want to see your dedicated efforts of a lifetime in developing an elite herd of purebred Angus cattle preserved for future generations, but it is the dream of a lifetime when you are fortunate to find a young couple like Trey and Dayna Wasserburger to make it all happen. Barb and I bought our first registered female in 1967, it was not until 1980, forty years ago, that we became laser focused on producing cattle that we believed were very functionally correct in every respect and that would be designed in a way that they could deliver value to all segments of the industry and satisfaction to the consumer. The result is a cow herd that is among the elite in the business and since the 1980's has been at the forefront of the quality revolution of the beef cattle industry. As Trey has said numerous times, he has never been around cattle that function with such a high level of fertility, maintain themselves while raising big calves, and utilize and perform on grass like the B/R, now T/D females. Trey and Dayna both have a long history of family generations in the commercial cow/calf industry and the feedlot industry. They understand completely the vision that Barb and I had for this herd and they have become extremely passionate about designing superior genetics that will deliver value to all segments of the industry.

Trey and Dayna have been very aggressive with their embryo transplant efforts and have increased numbers at a rapid rate. They have talked about the need to reduce some numbers and the time has come. We both believe that the best way to do this is a mature cow dispersal where buyers and customers will be able to select from the heart of the herd including that age group of donors that have been responsible for one of the best bull sales in the country. We are also thrilled that many of these females will carry the service of the \$525,000 T/D Doc Ryan from last springs bull sale making it possible for our buyers to be partners with TD Angus at Rishel Ranch on the front end of this journey with "Doc Ryan."

In addition to the "Doc," these females will carry the service of one of the most powerful herd bull batteries in the Angus business. B/R MVP is proving to be an incredible sire of great sons and very functional daughters. He is a member of the ST Genetics lineup and sired the \$30,000 top selling heifer in the 2021 Foundation Female sale at the Cattlemen's Congress in Oklahoma City. Musgrave 316 Exclusive is proving to be everything I thought he was the first time I laid eyes on him. His first progeny at TD Angus were extremely well received by some of the top Angus breeders in the country. He had been the top semen sales sire at ST Genetics for two years running. Spring Cove Crossfire26H, the \$120,000 purchase with Sitz Angus Ranch last spring and the \$280,000 HCC Whitewater 9010 will also present buyers with the opportunity to be among the first to own progeny by these popular young sires. In addition, the service of two great young sires straight from the heart of the TD Angus breeding program will be featured. They are the \$37,000 T/D Tribute 8351 and the \$30,000 T/D Bootheel 7, both already have calves on the ground and proving to be future herd bulls of considerable merit. Last, but not least, Basin Deposit 6249 is in residence at TD Angus and figures heavily into the breeding program. He is a sire that Trey identified and continues to impress us with the values he brings to the program. These sires and the females that carry their service represent the meaning of the "Most of the Best." We look forward to having you as our guest on Thursday, November 11, 2021, at the ranch for this outstanding offering of genetics.

*Bill & Barb Rishel*

# MATURE COW DISPERSION

## THURSDAY, NOVEMBER 11, 2021

12:30 PM CT / AT THE RANCH / NORTH PLATTE, NE

### SELLING EVERY COW OVER FIVE YEARS OF AGE

150+ SPRING BRED COWS & HEIFERS, ET HEIFER CALVES, HEIFER PREGNANCIES & RANCH BROKE HORSES

#### SALE LOCATION

3230 E Watts Rd. / North Platte, NE 69101

#### SALE SCHEDULE

**Thursday, November 11, 2021 (All Times Central)**

**8:00 AM** - Cattle Available for Viewing

**11:00 AM** - Complimentary Beef and Noodles Lunch

**12:30 PM** - TD Angus Mature Cow Dispersion

*Please join us for a Certified Angus Beef meal and beverages following the sale.*

#### SALE CONTACTS

Trey Wasserburger 307-660-8650

Bill Rishel 308-530-7999

Kenny Hanson 308-530-7958

Dayna Wasserburger 308-520-4718

#### AUCTIONEERS

Kyle Layman, North Platte Stockyards 308-660-5319

Jay Nordhausen, Ogallala Livestock 308-289-1548

**LOAD OUTS** Load outs will take place after the completion of the sale.

**CAN'T MAKE IT?** Buy with confidence on sale day! A TD Angus representative will buy on your behalf, within your budget, and we guarantee your satisfaction upon delivery.

**ONLINE BIDDING** The sale will be broadcast live on DV Auction.com. Please register to bid at least 24 hours in advance of the sale.

#### TRUCKING

Truckers will be available to assist you in the shipping of your purchases.

Contact Trey with questions.

Bryan Hauxwell Trucking 308-350-3884

Randy Lathrop, Lathrop Livestock Transportation 847-910-4673

#### GENOMIC TESTING

All of our cattle have been genomically tested using AngusGS powered by Neogen GeneSeek. **ANGUSGS**

**LIABILITIES** All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

**SUPPLEMENT SHEET** A supplement sheet will be available with complete and up-to-date information on sale day and will be posted online at TD Angus.com.

**GUARANTEE** Cows are confirmed bred to the printed date by Dr. Kevan Albertson of Stockman's Veterinary Clinic. Cows that we exposed to more than one sire will require calves to be DNA tested to register at the American Angus Association.

#### ACKNOWLEDGEMENTS

Don Schiefelbein, Past President, American Angus Association

Brett Weers, President, Nebraska Angus Association

Stockman's Veterinary Clinic, Dr. Kevan Albertson and Dr. Heather Richards

Del Miles, Consulting Veterinarian

Bill Dickie, Consulting Nutritionist

Curt Bittner, Consulting Nutritionist

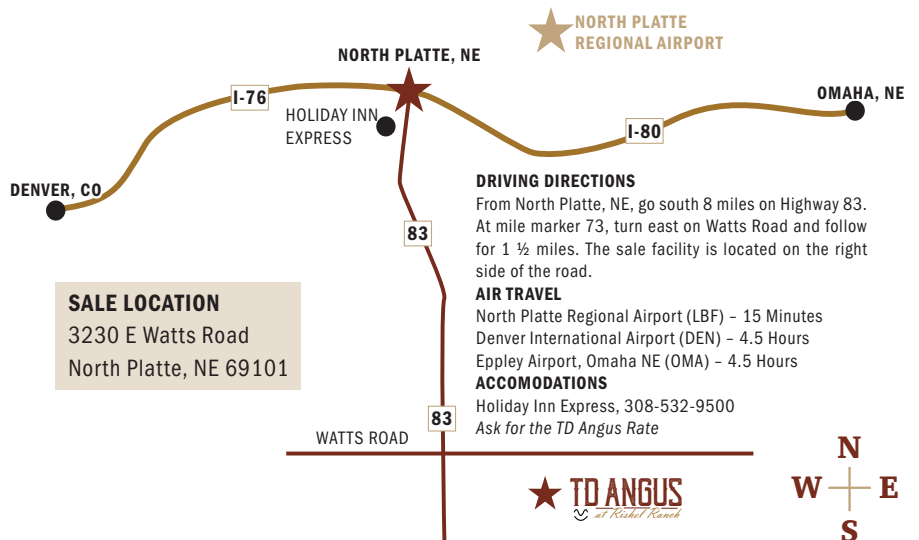

Bill and Barb Rishel, Special Guest

Mark Buoy, Brand Inspector

Hannah Shroyer, Catalog Design

Purple Visions Production, Pictures & Videos

**SPECIAL THANKS TO KENNY, NICK & THE TD CREW**

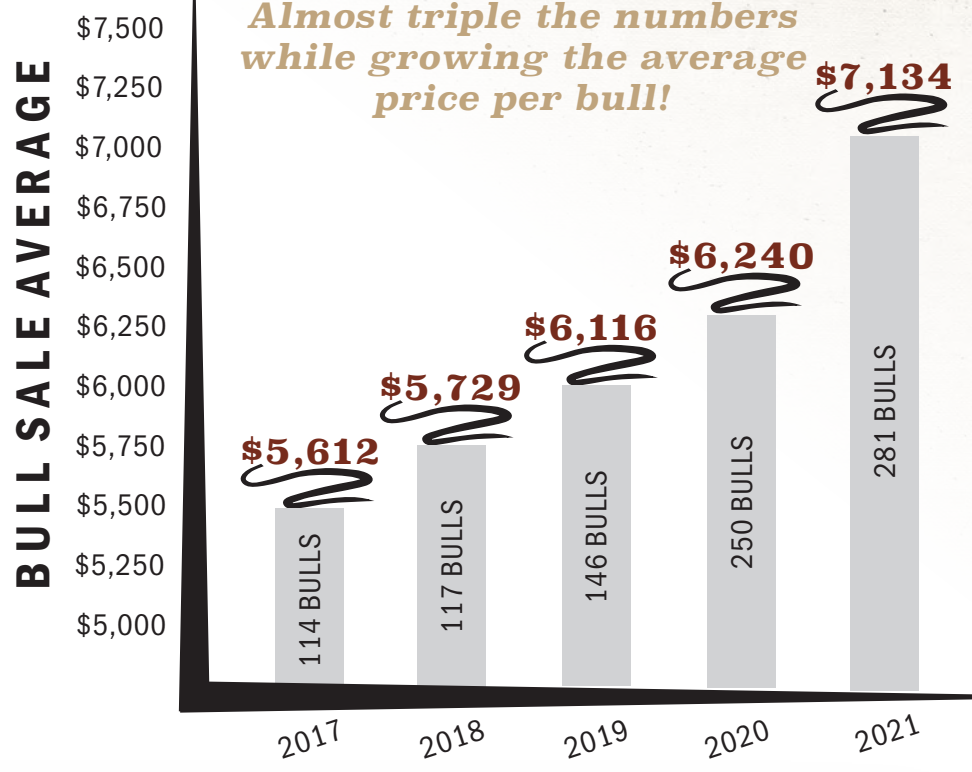

# BIGGER & BETTER

*This is the simplest way to show what this cow herd can do.  
Data tells a big story in a short time.*

Since our acquisition of the famed Rishel cow herd, we have been able to almost triple our bulls that are marketed every year and continue to grow our average price per bull through ET and retaining of replacements. This year, we will market almost 400 Angus bulls. The cows that sell today showed us how to do this and they can do this for anyone and anywhere. Without the depth of the cow herd, we would never been able to accomplish this. Before 2017, we had never owned or registered an Angus animal. Through the guidance of Bill and Barb Rishel, and our herdsman Kenny Hanson, we were able to not only keep one of the greatest herds of the breed on track but make it even bigger and better. More of the "most of the best."

*Almost triple the numbers while growing the average price per bull!*

This is a program. A program that is committed to our customers for a lifetime. A commitment of continued and progressive growth, unwavering customer service and a passion for this industry and our customers in it. We have no plans of going anywhere or getting any smaller. The cows that leave here today will be in our pedigrees for generations, where they will continue to add value to their new owners. When you buy today, know that whatever genetic piece you choose will continue to appreciate with every passing year. You are buying into this program. A program that has created this and they can produce this for anybody. Just like they did to two young kids with a year old son who had never been in the registered business 5 short years ago when hard work and opportunity met. Join us on our journey today.

## THE BEST IS YET TO COME.

# ANGUS EPDS EXPLAINED

*We want to simplify buying decisions for our customers. We try to present data that we believe has great economic merit and do it in a form that is easy to read and understand.*

## *birth traits*

**CED** – A higher number, more calving ease.  
**BW** – A lower number, a smaller calf.  
**Act BW** – Ratioed and incorporated into the EPD.

**INDUSTRY TREND** – Greater numbers of Angus sires are reaching extremely high CED and low BW EPD values, largely due to highly heritable shorter gestation lengths. We do not see it as a positive trend when calves become too small at birth. In addition, none of these birth traits measures calf vigor of a sire's progeny and mothering ability of the cow line. We do that for you.

**OUR RECOMMENDATION** for bulls to use on heifers is based on a combination of CED being +6 or greater and BW being +2 or less. We also look at the birth weight history of the bull's mother and cow family and the use of genomic markers and may adjust our recommendation accordingly. Using these criteria, we cannot recall the last time we have had a customer complaint with a calving difficulty problem.

CED	BW	WW	YW	RADG	DMI	DOC	\$M	\$W	\$F
12	0.6	73	122	0.20	1.56	19	75	78	83
ANGUS <sup>GS</sup> Act BW Adj WW Adj YW				HP	CEM	MILK	\$G	\$B	\$C
				16.7	9	24	43	126	238

## *performance traits*

**205 wt.** – weight adjusted for age of dam to 205 days, ratioed in contemporary group and incorporated into WW EPD.  
**365 wt.** – weight adjusted to 365 days, ratioed in contemporary group and incorporated into YW EPD.

**INDUSTRY TREND** – The industry is fascinated with chasing extremes of WW EPD and YW EPD to the top percentiles of the breed, and selection pressure will move them higher. Long-time customers that retain ownership through the feedlot have no problem producing 1450#-1500# pay weight steers from bulls that range from +94 (top 60%) to +126 (top 15%) of the breed. We believe this selection criteria will help us and our customers control cow size and cow maintenance requirements and therefore cow herd costs.

## *feed efficiency traits*

**RADG** – expressed in pounds per day, this is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed. A higher number is more favorable.  
**DMI** – expressed in pounds per day, this is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires. A lower number is more favorable.

**INDUSTRY TREND** – A search of the sire summary reveals major differences in sires in their combination of RADG and DMI. Some high-\$B sires have a desirable combination of high RADG and low DMI, while many others are upside down. It appears to be quite genetic and we have been utilizing it for several years in sire selection, not only for feedlot efficiency for customers who feed cattle, but for related cow efficiency for all customers.

## maternal traits

**CEM** – difference in percentage of unassisted births in a bull's daughters as first-calf heifers. A higher number is more favorable.

**HP** – selection tool to increase probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season.

**MILK** – predictor of a sire's genetic merit for milk in his daughters; it is part of a calf's weaning weight attributed to milk and mothering ability.

**DOC** – predictor of temperament and behavior of a sire's progeny.

**INDUSTRY TREND** – *We believe that CEM is one of the most overlooked and underutilized values we have in our selection tool box.* We believe that a less stressful unassisted birth in a first-calf heifer helps her be a better mother and allows her to recycle sooner, giving her a better chance of staying in the program for a lifetime of production. This is a major economic impact, considering the cost of heifer development. Similarly, HP has economic impact as well. It is a number we want to know more about, but we have been making an effort to use sires that excel with very positive numbers. When it comes to "milk," we have positioned our herd away from the extremes. We want our cows to milk enough to raise a big calf and not so much that it becomes a liability to reproduction and cow maintenance and to adapt quite well to a vast majority of the environment and resources of many of our customers' programs. The DOC EPD certainly has value as a convenience trait, but also has great economic merit in terms of how cattle perform and function. Higher levels of docility can improve conception rates in A.I. programs and will definitely improve performance in the feedlot.

**OUR RECOMMENDATION** – We believe these four traits (CEM, HP, Milk, DOC) have a great deal to do with maintaining a cow herd that has both reproductive efficiency and stayability which combined, lead to greater longevity. When a cow stays in the herd long enough to cover the cost of putting her in production, she becomes more profitable to the operation each year thereafter. It is the single biggest economic factor of profitability to the bottom line of a cow/calf operation.

## carcass traits value indexes

**Ultrasound** – Phenotypic data taken with an ultrasound machine that is incorporated along with genomic markers for carcass merit into the carcass EPDs.

**EPDs** – The carcass EPDs are the ultimate selection tool for carcass merit.

**\$Value indexes** – multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)** – expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)** – is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)** – is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

**Grid Value (\$G)** – is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)** – is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires. ***\$B does not include any prediction of fertility, maternal value or stayability in the cow herd. It is a terminal post weaning and end product economic value.***

**Combined Value (\$C)** – an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

## Musgrave 316 Exclusive {#18130471} X T/D Ruby of Tiffany 824 {#19145055}

The first chance to acquire a female from one of the most promising females in the breed, T/D Ruby of Tiffany 824, the mother of the all-time high seller, T/D Doc Ryan 049 who sold to Herbster Angus Farms for an astounding \$525,000 last spring. Doc Ryan broke every record we had here for weaning (#920) and yearling (#1560) and backed it up with impressive ratios of 144 IMF and 122 RE. He was admired by all cattlemen and is incredibly sound, powerful in his make, massive ribbed with added length with a quiet demeanor and unmatched athleticism. He truly is the most of the best. His mother, raised him as a first calf heifer in the Sandhills with nothing but green grass and well water and she bred right back. The only way to describe her is to call her a calf raising machine. She dug another monster to the scales this year as well. She is a hard working cow that is moderate made, perfect uddered and super correct in her kind. She is the ideal cow for the industry and every commercial cattlemen would love to have a ranch full of females just like her. This will be the first daughter to ever sell out of "824" and we couldn't be more excited for it to be out of our proven herd sire, Musgrave Exclusive 1175 who has been the top semen seller for ST Genetics for the past three years who's progeny have topped sales all over the nation, including our top selling Fall bull and Lot 1, T/D Executive to Sitz Angus last year. This genetic mating combines two of the best cow families not only in our program, but we believe in the country. Sells with recip due 6/1/2022.

## HCC Whitewater 9010 {#19870506} X Musgrave Prim Lassie 163 {#17511838}

Another exciting heifer pregnancy coming from the mother of Musgrave Exclusive 1175, this time mated to the \$280,000 seller of the spring season, HCC Whitewater 9010. Whitewater went to one of the most diversified and respected owner groups ever assembled, with TD Angus being one of them. Our friend and trusted eye for cattle, Bob May called us when he saw "Whitewater" and described him as "having a show ring presence". He is big hipped with body length, incredibly sound and a EPD package that offers calving ease, high heifer pregnancy and breed leading carcass. To put it simply, he has the "most of the best". Bill Rishel had the opportunity to see him this summer and he called him very sound with an athletic body, great length, gentle demeanor in a moderate package. With very limited semen sales and out of an elite cow, this pregnancy has incredible uniqueness and value. Sells with recip due 6/1/2022.

**T/D Doc Ryan 049 {#19820224} X Musgrave Prim Lassie 163 {#17511838}**

Elite heifer pregnancy sired by the \$525,000 all time high seller of the program, T/D Doc Ryan 049 and out of Musgrave Prim Lassie 163-386, known in the industry as "Exclusives mother". This combines two of the most powerful pedigrees in the Angus breed. T/D Doc Ryan represents 8 generations of Rishel Angus cows and broke the weaning weight (#920) and yearling weight (#1560) record while scanning an incredible 144 IMF and 122 RE ratio. He was admired by many astute cattlemen for his length of body with incredible mass all under an athletic and sound package. We do not know another bull that has his kind of phenotype and genotype package in the Angus breed.

Musgrave Prim Lassie 163 has been best described as "right for the industry". She has a beautiful front end, is big ribbed with a perfect udder all in a moderate frame and perfect foot. Musgrave Exclusive 1175, TD Angus herd sire, has been called the best bull to hit the Angus breed in a decade and with his mother's power behind him it is no secret. A truly special mating and one that won't be replicated. Heifer is in a registered recip and is due 1/22/2022.

**T/D Doc Ryan 049 {#19820224} X Baldrige Isabel F047 {#19235220}**

Progressive and unique pedigree behind this heifer pregnancy out of the \$525,000 T/D Doc Ryan 049 and the one of the newest and most powerful new donors in the Angus breed, Baldrige Isabel F047. F047 had her "unveiling" at the Baldrige Performance Angus female sale this June where she sold three lots for \$87,000 including one heifer pregnancy by TD Angus herd sire, HCC Whitewater 9010 to Dixie Valley Ranch from Montague, CA for \$47,000. F047 was a crowd favorite at the sale by all who admired her for her sheer peer and volume and she will be an elite donor for both the Baldrige and TD programs as time goes on and will see lots of high profile exposure.

She has a bull calf that will be featured in this year's TD Angus bull sale (#20105042) that is 83 WW, 150 YW and still breed average for mature height and weight with a 16.5 heifer pregnancy, and a 1.0 MB and .86 RE with a 313 \$C. This mating was called a "Lincoln County explosion" by another breeder with the combination of two of the most powerful cow families not only in the county, but in the breed joining together for one exciting heifer pregnancy. Sells with recip due 2/1/2022.

Those that have seen this cow know why she is Lot 1 like many of her past and future sons. "3210" has proven herself to be an elite donor time and time again and continues to be one of the most favorable phenotypic females on the place. She is big bodied, perfect uddered, very sound, the ideal Angus cow phenotypically that catches the eye of visiting cattlemen across the nation.

She has ten daughters retained in the herd and we have never offered a female out of her. She produced the Lot 1 fall bull two years in a row. Lot 1 son by "B/R Nationwide 69" sold for \$19,000 in 2020 and Lot 1, "T/D Executive 9604", son by "Exclusive" to Sitz Angus, Beartooth Angus and Carson Young sold at \$40,000 in 2021. **Selling 1/2 interest with an option to double.**

**“Big bodied. Perfect uddered. Very sound. The ideal Angus cow phenotypically.”**

They say sell what stings and this one hits hard. We love this cow's pedigree and phenotype. She is an outcross pedigree cow, that is really long bodied, smooth and clean, great fronted and smooth shouldered. She is the mother to the ST Genetics sire, "MVP", as a first calf heifer. Her sire, "1148" is a maternal brother to B/R Comdrade 49, the \$34,000 top-selling bull. Daughter by Casino Bomber N33 sold at \$10,500 in 2020 as an open yearling heifer. 3BWR@96, 3WWR@104, 3YWR@104. Dam's record: ACI 6 calves @ 396 days, 6WWR@110, 6YWR@104, 8%IMF@102, 8RE@100. Selling 1/2 interest with an option to double and a registered bull calf by the ST Genetics top selling sire, "Exclusive" on her side.

# THE PRIDE SISTERS

The story of the "Pride Sisters" being offered in this TD Angus at Rishel Ranch mature cow offering is a rare opportunity in proven Angus genetics. It is not unusual to see one ET female from a flush rise to a place of recognition in the breed. It is extremely rare to find three ET full sisters rise to the level of recognition of the "Pride Sisters" at TD Angus and attain that recognition based on the combination of outstanding phenotype and production history documented by the purebred and commercial cattle industry acceptance of their progeny. Their sons have consistently been featured bulls in the annual bull sale and their daughters, the few that have been offered, have been highly valued. I believe the reason these "Pride Sisters" are so unique is the maternal power of their pedigree. Their sire, B/R 65R Genesis, was a member of our pen of bulls at the National Western in 2004 and he sold to Spring Cove Ranch in Idaho and 65 Roses in Iowa. His dam B/R Blackcap Empress 127 was a tremendous daughter of the \$22,000 B/R Destination 727, our top selling bull in 1998, and sire of the incredible female and carcass sire B/R Destination 727-928. "727" was the first calf out of B/R Ruby of Tiffany 5113, the full sister to B/R New Design 323. Look up the "Empress 127" cow and you will find that she still maintains a marbling EPD of +1.09, twenty years after her birth. In addition, the dam of "127" is a daughter of B/R New Design 323 and maternal sister to B/R Destination 727-928. That makes the second cow back the dam of "928" and the third cow back the dam of non-other than the foundation sire of all "New Design" cattle in the breed, B/R New Design 036. The dam of the "Pride Sisters" was a daughter of G A R Grid Maker. A powerful female with tremendous volume of rib and wide based giving her lots of capacity and internal dimension. Not surprising when you see "Grid Maker's" dam was the historic G A R Precision 2536 cow that became the center piece of the Wehrmann program in Virginia and the third cow back on the pedigree of the "Pride Sisters" was a daughter of one of the great female sires of all time AAR New Trend. The line breeding of great cows and the sires of great females in the pedigree of the "Pride Sisters" goes a long way to explaining the greatness of these females.

Their record as Paul Harvey used to say is, "The Rest of the Story". The "1551" cow made history when her 2006 bull calf, B/R Nationwide, topped the annual sale at \$110,000 to a group of Angus breeders known for producing exceptional cattle. In that same event his full sister B/R Pride 618 topped the female division at \$60,000 to Knox Angus, San Angelo, Tx. While the results of early ET work with "1551" was off the charts she really established herself as a premier donor in the TD Angus program in the 2019 bull sale when six sons by "Playbook" led off the yearling division as one of the most uniform and powerful sets of full brothers anyone has ever seen in this business. These six averaged \$8,708 with a top of \$11,500. To date the progeny of "1551" have accumulated sales of \$350,000. When you remove the sale of "Nationwide" and the sale of daughters, 22 sons at auction have averaged \$7,535. In the meantime, the value of her (16 daughters) that have been retained in the TD Angus program is still to be determined.

As popular as the "1551" cow has been, her "1421" sister has consistently been a favorite of many of the breeders who have seen these females in the flesh. Her offspring have certainly garnered plenty of attention when her "Demand" son sold for \$15,000 as one of the top bulls in 2007 and a "Cavalry" daughter sold for \$16,000 in 2009. She placed four sons in the 2020 bull sale that averaged \$8,125 with a high of \$8500 and low of \$7500. Her consistency of quality in her offspring is documented in the 13 progeny that grossed \$104,500 in TD Angus sales to average a strong \$8,038. The history of her (19 daughters) retained in the program is yet to be written.

With "1551" and "1421" garnering so much attention, it has been a lot like having three full brothers in a sale. Everyone wants to buy what they think is the best one no matter how close they might be in phenotype and production. The popularity of the two sisters, in my opinion, caused all of us involved at TD Angus to concentrate on ET work with those two and I'm willing to say for myself that I was a little late to the party. Placed in the donor program two years later than her sisters it did not take long for "1521" to display her power. In the 2019 bull sale the yearling bull division was led off by eight sons of the "Pride Sisters" and the four sons of "1521" were the premier feature averaging \$8,438. To date her 11 sons at auction have grossed \$82,500 to average \$7500. The (10 daughters) retained in the program are treasured and it will be exciting to see what the future holds.

**Lots 3-5 each sell with 5 embryos sired by the \$525,000 T/D Doc Ryan 049, Reg #19820224.**

A sale highlight and lead donor in our program. "1551" has been described by cattlemen from across the country as one of the most powerful Angus cows they have seen. She has proven herself time and time again with a pinnacle sale of B/R Nationwide 69 at \$110,000 and top selling \$60,000 "618" open yearling heifer in 2017.

Today she amassed an incredible production record with 6WWR@110, 6YWR@110 and an incredible 60 calves with ultrasound scans ratio 103 for %IMF and 101 for RE. With three natural calves before entering the donor pen -- two of these natural calves being the \$14,000 B/R Capstone 474 and the \$14,500 B/R Demand 5104.

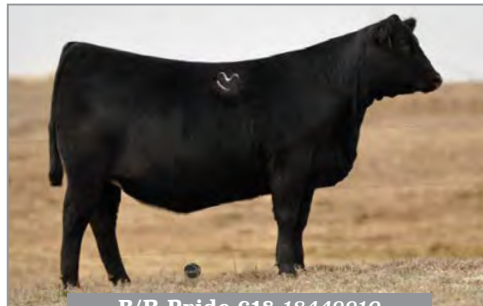

B/R Pride 1551 and her flush sisters, "1421" and "1521" both also selling, possess a lineage for greatness sired by one of the great power bulls in the history of the program B/R 65R Genesis. The cow family behind "Genesis" starts with B/R Blackcap Empress 127, born in 2001 and still boasts a MB EPD@1.09 (4%), \$G@+69 (4%) and \$B@+155 (10%). The second dam, B/R Blackcap Empress 8183 (daughter of B/R New Design 323 and dam of B/R Magnum 399) born in 1998 boasts MB EPD@+1.06 (5%), \$G@+\$71 (3%) and \$B@175 (3%). The third cow back is the dam of B/R Destination 727-928 who nearly 20 years later has \$B@+158 (10%). The fourth cow back is the legendary B/R Blackcap Empress 76, mother of one of the greatest impact sires of the last 50 years, B/R New Design 036.

Will sell with 5 embryos sired by the \$525,000 T/D Doc Ryan 049, Reg #19820224.

"1421" is always a visitor favorite and is the first one in the pasture to be noticed with her feminine phenotype, perfect udder and high volume while always towing a big calf behind her. She produced the powerful \$25,000 B/R Demand 628 in the Dikoff Dispersal in 2017 and has 23 daughters retained in the program and we have never offered a female out of her to this day. She is a flush sister to the "Three Prides" donors along with "1551" and "1521". A friend and respected cattleman saw her a couple weeks and simply muttered, "you cannot sell that one." We are and she's bred to the historic Doc Ryan to insure a fast payback on the new owner's investment. Confirmed pregnancy due 2/27/2022, AI service 5/21/2021 to T/D Doc Ryan 049, Reg #19820224.

Will sell with 5 embryos sired by the \$525,000 T/D Doc Ryan 049, Reg #19820224.

# Doc Ryan 049

**“As special and unique of bull that we’ve ever raised and possibly ever seen.”**

DOC RYAN is the \$525,000 all-time high seller at TD Angus going to Herbster Angus Farms. Doc Ryan broke every record here for weaning (#920) and yearling (#1560) and backed it up with impressive ratios of 144 %IMF and 122 RE. He was admired by all cattlemen for his incredible soundness, powerful make, massive rib with added length with a quiet demeanor and unmatched athleticism.

*He truly is the “most of the best.”*

His mother raised him as a first calf heifer in the Sandhills with nothing but green grass and well water and like an elite cow does after raising a scale crusher, she bred right back. She is an ideal female for the industry, tremendous length of body with a perfect udder, really sound and has that classic feminine Angus cow wedge shaped look. She goes back 8 generations that were raised at this ranch that were all donors in their own right.

Doc Ryan was our heaviest used sire group this spring and these cows that are bred to him will be the first calves ANYWHERE to hit the ground sired by the game changing sire. An incredible 30+ females sell sired to this sire and elite heifer pregnancies sell out of our front end donors by “The Doctor.”

When you look up “Most of the Best” in the dictionary, you will find Exclusive. Exclusive will remain forever as the first herd bull we have ever purchased that completely exceeded any of the expectations we set for him. He came to us after proving himself in a commercial herd and after his first calves hit the ground it was recognizable that he would be a breed changer. In the first sale featuring his progeny, he sold a son to two historic Angus cow herds in Lot 1, T/D Executive 9604 for \$40,000 going to Sitz Angus and Lot 141, T/D Platte River 0184 going to Krebs Ranch for \$15,000. His cow family is filled with Pathfinders and power and his mother, who resides at TD Angus and sells a heifer pregnancy in this sale, is a high volume cow with a perfect foot and udder and cuts a wide swath when she walks the Sandhills. Exclusive has an incredible progeny record with BW @ 100, WW@100, YW@101, IMF@101 and RE@100 with an amazing 1800 calves reported in over 200 cow herds. Exclusive has been the high selling semen seller for ST Genetics for the past three years and after getting his first daughters in production this fall, he will be continued to be used here extensively.

“The best herd bull to come out of the program in the last decade.”

Many would argue this is the best herd bull to come out of the program in the last decade. MVP has done it not only the hard way, but the right way as a herd bull, through hard earned real life production. After first going out and working in a commercial herd, he came back to the ranch to start cleaning up the registered cows and his calves quickly rose to the top of the crop. MVP stamps his progeny with mass and power, a great foot and one of the quietest demeanors we have seen a bull sire. He absolutely stamps his progeny. He has and will continue to be used through AI, ET and as clean up bull at the most of the best because he is simply that. His mother sells as Lot 2 and could be the greatest cow we have ever offered for sale.

These will be the first calves to be offered by the record setting Spring Cove Crossfire 26H who we purchased with friends and some of our favorite cow herds Sitz Angus and Triple L for \$120,000. There is a lot to like about this bull. He is super masculine and big crested, smooth shouldered, has tremendous capacity and mass and a super athletic move to him. His mother is an elite cow and the grandmother resides at TD Angus and she has a phenomenal production record with a calving interval of 6 @ 363 days, 5 BW @ 95, 5 WW@102 AND 5 YW@102. She is a perfect made female with length, mass, a perfect udder and always brings in a big calf in the Fall. The "Crossbow" daughters in production are elite and with his cow family behind him, we couldn't be more excited for this young sire and he will see heavy use here. 10+ females sell bred to this sire.

A new herd sire for TD Angus, HCC Whitewater is seeing his first use in the industry here and these cows will be some of the first calves to hit the ground by the crowd stopping high seller. He was the record setting \$280,000 bull at the Heim Cattle Co Sale who sold to one of the most diversified groups that the breed has ever seen stating his uniqueness for all kinds of breeding programs. Whitewater has that "herd bull look" and "presence" and is really athletic in his movement. He puts together elite calving ease, heifer pregnancy and carcass all while keeping mature weight and mature height in the cow herd in check. Bill Rishel saw Whitewater this summer and he described him very sound in an athletic body, great length, gentle easy going demeanor in a moderate package. 15+ females sell safe to this new and exciting sire.

New TD Angus herd sire that will sell his first sons at this year's bull sale and has a son in the running for Lot 1 this year for our Bull sale on March 18th. They found him on a trip to Montana after looking at his first sons at Basin Angus who would later sell a son for \$36,000 to ABS that year and also has another son, Basin Jameson 1076 who is one of the most talked about bulls in the breed for this year's bull sale season. Deposit is described as a perfect footed, long bodied, masculine and athletic bull who has an incredible production record that is proven with BW ratio @ 100, WW @ 103, YW @103, IMF @ 105 and RE @100 with 14 herds reporting. He is well on his way to becoming a breed leading sire that brings incredibly carcass quality and marbling while maintaining muscle and performance. His mother is an elite cow who sold to Hollow Top Angus for \$52,000 for half interest and her grandmother, Basin Lucy 1037 is one of the most powerful cows we have ever seen on the hoof. Moderate calving ease, performance and pounds, heifer pregnancy and carcass quality out of a proven cow family, that is the most of the best.

Service Sires

# Spring Bred Cows

The calves off these sale cows were weaned the 1st of September and were raised on their mother's milk, sandhill grass and well water only. The production and her efficiency to do her job is strictly on the cow here. Two weeks later we went out on horseback and gathered the cows in a section pasture and took pictures and videos in a barb wire pen. The cows were unclipped and when we say they are in their working clothes, we mean it. These cows are presented in the way they will look for you in your pastures. These cattle are run on a ranch just like they were 100 years ago and it has made these females through 50 years in the business elite in being able to go and work in any environment- just like their bull progeny can go out in any environment and perform for our commercial customers.

A great cow - a calving extraordinaire with great heifer pregnancy (+16.5) that is really soft and cowy in her make out of a Pathfinder by "New Day 454". ACI 7 calves @ 365 days. 5%IMF@102. A good cowman, Nick Kunz, bought her heifer calf for a replacement in his cow herd and nobody studies them harder than him. We have threatened to flush this cow multiple times. Confirmed heifer pregnancy due 3/15/2022, pasture service 5/26/2021 - 6/24/2021 to JVC Cavalry V3326, Reg #17784803/ B/R Compadre 5201, Reg #18271175.

Here's a real power cow with lots of of body. She has a really beautiful, really good "MVP" heifer calf in the replacements. ACI 3 calves @ 383 days. Daughter by "In Focus" posted ratios of 205(109), 365(109) and caught to the first AI with a tremendous "Tribute" heifer calf this January. Confirmed bull calf pregnancy due 2/13/2022, AI service 5/6/2021 to T/D Tribute 8351, Reg #19218761.

# spring bred cows

## Spring Cove Cows

In the Spring of 2018, we had the chance to rent out the historic Vierson ranch north of North Platte and we jumped on the opportunity. It was late in the spring season and we didn't have the numbers to fill the ranch so I called what I considered one of the best registered angus ranches in the business with a productive, functional cow herd that closely resembles the most of the best. We called Art and Stacy Butler at Spring Cove ranch in Bliss, Idaho and bought a pot load of young cows with heifer calves on there side to fill the ranch. It was a sight unseen deal, made in a hurry and it couldn't have been more grateful and appreciative of Art and Stacy for accommodating us. You will notice throughout their pedigrees our genetic influence. These are the older cows of that purchase and they have more than pulled their weight here and with confidence we can say they will continue too for the next customer.

# THE HEIFERS

## Spring Open Heifers

These heifer calves were weaned the 1st of September and they are presented in a way that you can see the kind and quality they possess. They came off a 16 section Sandhill ranch off their mother's milk and green only—just like they did 100 years ago. They have not been pushed in anyway or treated any different from their contemporaries.

A super maternal pedigree in "GPS" and "454" sired by the \$22,500 top selling fall bull to ABS in 2017. Dam (sells as Lot 78) is a powerful "454" with an ACI of 3 calves @ 383 days and due with a confirmed bull calf pregnancy to T/D Tribute 8351. Paternal dam sells as Lot 8 in the donor division of the sale and paternal grandam is the mother to "Right Cross 70024".

# Spring Bred Heifers

These heifers come out of our heifer development program that are purchased from customers. Most of the heifers in that program we do not keep up the registration papers with, but with these elite females we have. These would be the front end of almost 100 registered females and are all sired by our herd sire, TEX Playbook 5437 or a son of his who has proven his weight in maternal power with an incredible 109 \$Maternal index with thousands of daughters in production. Playbook daughters are easy fleshing, good uddered and really gentle. Seven of these heifers are AI'd to Musgrave Exclusive 1175 which is a phenomenal cross, see Lot 126 in the heifer calves. What an opportunity to put together a big set of half sisters that will have 1/2 blood sibling calves. If somebody wanted to start a registered herd, this would be a good way to start. All of these bred heifers sell with registration papers and are parentage and genomic tested and all calves can be registered.

# COMMERCIAL HEIFERS

**A**

**55 HEAD OF COMING 3-YEAR OLD ANGUS COWS  
NORTH PLATTE, NEBRASKA**

*Calve March 15th for 60 days / Deliver November 15-20th*

Front end set of coming 3 year old Angus cows that originated from the Feed Test High Yield champion DeGering Livestock in Lusk, WY and Mt Rushmore Angus from Hermosa, SD. Sort from 60 head. This will be one of the most front end set of young cows to sell in the country. Half of the cows would be registered Angus (sell commercial) and half would be F1 baldys. They are bred to a powerful set of bulls including two sons of Cavalry and one Exclusive son. Never offered before. #1200. Calves will be TD Feed Test qualified.

**B**

**150 HEAD OF ANGUS BRED HEIFERS  
STAPLETON, NEBRASKA**

*AI to Exclusive to calve February 20th for 35 days / Deliver November 15-25th*

Fancy set of one iron, home raised bred heifers that are originally the Flaming heifers (2x Feed Test RADG champions) that have not been topped and are the front end of 400 heifer calves. The Flaming herd has used Cavalry and Playbook sons and AI to TD herd sire B/R MVP 5247 the past two years. These heifers are as stout as you make and know how to work for a living. Incredibly offering. They are AI to TD herd sire Exclusive to calve February 20th and cleaned up with TD Angus bulls for 35 days. #1100

**C**

**165 HEAD OF ANGUS BRED HEIFERS  
STAPLETON, NEBRASKA**

*AI to Exclusive to calve February 20th for 35 days / Deliver November 15-25th*

Fancy set of one iron, home raised bred heifers that are originally from the Lydic Ranch of Maxwell, Nebraska. This is the front end of 300 heifer calves that were not topped. This is the first time the Lydic ranch sold all their heifer calves in 40 years. These heifers are the direct daughters of a cow herd that has roamed the canyons of south central Nebraska for generations so they know how to work for a living and raise big calves. AI to TD herd sire Exclusive to calve February 20th and cleaned up with calving ease TD Angus bulls for 35 days. #1100.

# commercial heifers

**D**

## **BOOTHEEL 7 BRED HEIFERS / 94 SORT TO FIT LUSK, WYOMING**

*Calve February 25th for 20 days / Deliver November 15th-22nd*

Fancy one ironed home raised black and black baldy bred heifers. These cattle are 2x feed test winners in Highest prime and highest CAB. Due to drought conditions we have decided to sell these beautiful heifers. Bred to T/D Angus Bomber bulls out of the great Casino Bomber N33. Loaded with calving ease, growth, and maternal traits that rival most registered cow herds. Lots of these cattle are AI sired to Hoover Dam, GPS, MVP, and TEX Demand to name a few. Bootheel 7 Livestock has been doing carcass ultra-sounding for several years so these cattle will get you every premium hanging on the rail.

**E**

## **BOOTHEEL 7 REPLACEMENTS / 76 SORT TO FIT LUSK, WYOMING**

*Calve April 1st for 20 days / Deliver November 15th-22nd*

Front end of the straight black replacement heifers as fancy as you can make one. These heifers have shown us they can perform and make money year after year. Due to drought conditions and no fault of their own we are letting these go to make someone else money. Calves out of these heifers are also bred to T/D Angus Bomber sons. Lots of these cattle are AI sired to Hoover Dam, GPS, MVP, and TEX Demand to name a few. With these genetics, all the sisters of these girls that are open are sold in our direct to consumer business. Our loss is your gain on these girls. They will pay for themselves on your place in short order.

**F**

## **180 HEAD OF ANGUS BRED HEIFERS STAPLETON, NEBRASKA**

*AI to MVP to calve 2/25 and cleaned up with TD Angus bulls for 60 days / Deliver November 15-25th*

Special and rare offering coming from the Historic Diamond Bar ranch. These are a large group of home raised and purchased heifers (two ranches) that have been developed since they were calves to thrive in the harshest of environments. Cows at the Diamond Bar are the ideal type working female that is expected to bred back every year and bring a big calf to the scale in the fall. Nobody, and I mean nobody sells feeder cattle higher than the Diamond bar does and that is for good reason. Loaded with powerful TD genetics, a front end set and coming from one of the hardest working families in the Sandhills.

**FLASHY JACK** AQHA #5658308

**DOB**

**SORREL  
GELDING**

This is the pick of the geldings of Bill Rishel. Everybody asks about him when they drive by the pen and anybody can ride him. Nick used this horse all spring heat checking and sorting to go to grass and he was used all summer to prowl big Sandhill pastures. He has a black type pedigree with multiple NCHA hall of famers in his lineage and will really watch a cow. I love his big rear quarter and classic quarter horse look. I can't say enough good things about this gelding. Somebody will be mounted for a long time with this one. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

**GRAY  
GELDING**

As stout and as pretty as any gelding we have ever offered. He is packed with muscle and has a tremendous amount of cow. He was used by a good friend in the Great Basin in Nevada to ride in the big BLM allotments gathering cows and doctoring yearlings. Nick and I both have rode this gelding and gotten along with him. He is a pet and you can walk right up to him and catch him. His flea bitten gray coat is an incredibly hard to find and being out of the great Playgun, this horse is one of a kind. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

**SORREL  
GELDING**

Fancy working class gelding that Andrew Wasserburger used in the big country of Niobrara county, Wyoming. He has roped a ton of cattle outside on him and he has seen many long days. Of all the guys that help get these sale ranch horses ready, Andrew's string always comes back with a lengthy and extensive resume. His horses absolutely see and do everything there is to do on a ranch and in a feedyard. This gelding is well bred, rides around like one should and could make a rope horse overnight. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

**BLACK  
GELDING**

Unique and flashy gelding here that came from a good friend from the Badlands of South Dakota. We absolutely love this gelding at Rishel Ranch. I drug a lot of calves on this gelding this spring and everywhere I went people asked about him. Any visitors to the ranch with little to no experience riding used Tux and he never took a bad step. He is 100% gentle and is coal black with a big white strip on his face and two hind socks. Our girls have ridden him and I think anybody that can hold a rein can too. If our children were a little bit older, this gelding would never leave. He is that kind. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

 **TELL YA HEEZA BOON** AQHA #5738465

**DOB**  
5/3/2016

**BAY ROAN  
GELDING**

Big, stout rugged made gelding that has seen a lot of miles and is incredibly trainable. Every time we ride this gelding we teach him something, he remembers it the next ride. I don't know how far this gelding will go but it will be far. I love his pedigree and I love his look. Nothing looks better than a bay roan trailing some big angus calves to the scale. Heavy made with ranch horse experience in that bay roan cowboy color. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

**BLUE ROAN  
MARE**

A pretty ranch mare that is coming from a good cowboy and family, Matt and Miranda Wells. This mare has been used on all aspects of ranching and has been uses to rope outside and been doctored on by herself. She can sit for long periods of time and ride of just the same as she was before. She has seen lots of miles and been behind a lot of cattle. This is the first time we have offered a ranch mare because she is an exception to the rule. Gentle, pretty, cowy and coming from a good hand. She could do the ranch chores and raise the next great one for somebody. Contact Jeremy Knoles of Knoles Performance Horses at 806-330-1701 for more information.

# MUSGRAVE 316 EXCLUSIVE

**TD ANGUS**  
at Rishel Ranch

Exclusive is with one of the 316 sons Musgrave's have decided to use heavily. His flawless phenotypic package offers super foot structure with a massive, muscular presence. Use him to add power and performance to your cow herd.

REG: AAA 18130471 • DOB: 2/6/2015

**ST Genetics**

We had the opportunity to acquire a portion of the bull while Bill was visiting Musgrave Angus and saw him at work on cows and he was thoroughly impressed. He is the highest \$B "316" son that offers exceptional docility, great feet and structure while still maintaining an EPD profile that ranks him as one of the top carcass sires in the breed. **Semen is available in conventional and sexed through ST Genetics.**
