at Rishel Ranch

380+ BULLS SELL

NEXT GENERATION HERD SIRE SALE

FRIDAY, MARCH 18, 2022

12:30 PM CT / AT THE RANCH / NORTH PLATTE, NEBRASKA

welcome

Greetings Fellow Cattlemen -

Welcome to TD Angus. Since purchasing the cow herd from Bill and Barb Rishel in 2017 we have been drinking from the firehose in the registered Angus business. Since then, we have seen blizzards, droughts, road closures, bomb cyclones and pandemics all on sale day. We have also seen a myriad of issues within the beef industry that had never been seen before like tight packing plant shackle space and supply chain issues, but for the first time since I have written my welcome letter for the catalog, my tone is different. I have never been more optimistic about the entire cattle industry than I am today.

There is no question that cattle supply is moving in the direction of producers' favor. With a 2% decrease in cows in production this year and the prime/choice spread never being larger and in more demand, there has never been a time where keeping your cow herd genetically current and progressive has never been more critical. In the past two years in our family feedlot, we have seen a cherry picking system within the packing industry where they are competitive for the "good" ones and the rest stay idle in the pen homeless. Some inferior pens will sit for 2-3 weeks longer on feed where we are forced to give into the broken non-competitive weighted average system and instead of being a price getter we are a price taker. I can personally tell you that packers want the product we, and when I say we, I mean my customers, want and they will compete for them. Since the beginning of the TD Feed Test in our inaugural year of 2020, where we not only get to give out \$25,000 cash to deserving customers and programs that had embraced our philosophy of the "most of the best", but we have created a product unlike no other in the beef industry. It becomes clear when packer buyers and visitors to the feed lot drive by a pen and ask, "Are these on the feed test?". They want what we are making. And believe me when I tell you, that is maybe the most valuable aspect of the industry right now with a bottleneck at the plant. I even see it at the feeder marketing level, where customers will sell their calves and many will bring \$5-10 per hundred over a feeding breakeven. Incredible. It isn't a secret. This program is working for our customers, the feeders, the packers and the consumers. The entire supply chain wants this product. They want the most of the best.

It is well known in the industry that this program creates elite feeder cattle that will not only hang a big carcass, but a high grading carcass. But our mantra of the "most of the best" also creates cow herds. Cow herds whose daughters go out and raise those heavy weighing, prime grading feeder cattle. With the massive reduction of the beef cow herd in the last couple years, it has never been more important to create replacement heifers that do just that. Those type of females will not only be in high demand going forward, but almost irreplaceable. In our marketing business, I have never sent more replacements and young cows to parts of the country to feed where they are genetically inferior to the northern Angus female. We have dramatically improved their cow herd overnight and we will be competing against those females calf crops in the near future and we must remain progressive in our genetic selection. These bulls will help us stay ahead of the impending and competitive future and continue to bring those premiums at the feeder and packer level. Guaranteed.

This offering is our largest ever. We will offer over 380 Angus bulls, three times the size of our first sale in 2017. With almost 100 embryo transfer bulls, coming out of our elite donor cows, this sale will have the most value to commercial cattleman than ever before. This year's yearling offering is incredibly deep. When we made our first cut at weaning and I sorted for kind, over half of the yearling offering made the front pen. That has never happened. Since then we have continued to sort and sort on these bulls. Up until print time for the catalog, I was still cutting on the offering. These bulls have also never been tested harder and do more with less. The fall bull offering was out on Sandhill grass until December 20th and in turn they have never had better semen quality and function and soundness to them. The yearling bulls have been on a high roughage, low megacal ration with a targeted 3.0 average daily gain to insure longevity. The average actual back fat on this offering of bulls is .10 in the Fall bulls and .11 in the yearling bulls. Industry standard for fat cattle is .48. That is a huge difference and a great indicator these bulls have not been pushed in anyway shape or form. Multiple times this winter, the yearling bulls when check weighed, were gaining over 4.0lbs per day and twice had to be reared back. I have never seen cattle do what these bulls have done on a meager growing ration. We registered 1,036 Angus animals last year, with over half as bulls. Only 380 of those 500 registered bulls made this sale. This is the front end of the front end. I have never been more optimistic about the cattle market moving forward and I have never been more excited to offer not only the largest set of bulls ever, but also the best. This is the culmination of our program, from conception to consumer, of the most of the best. And it all starts right here with our customers. Opportunity abounds right now, and our family is invested in every aspect of the industry to bring prosperity to all sectors of the industry. Join us. Every day of the year we go to work for our customers at any level, but the one day a year we sell the most of the best. Join us on March 18th for the largest and best offering to date.

Trey & Dayna Wasserburger
Westyn, Gentry, Gwyn, and Wacey

380+ BULLS SELL

A Word from Bill -

This year for my letter I thought rather than talk about the offering in this sale I would write about the breeding program philosophy that has been in place in this herd for more than forty years. A priority for this program has always been to build a very practical, functional cow herd and that has to do with structural soundness, great udders, and exceptional fertility.

We like to say that these cows should be working for us and not us working for them. Our job should be to provide care, good health, and nutrition and their job should be to produce the best bulls in the industry for our commercial customers. It is not a bad thing when an individual excels in a few traits. When used properly in a complimentary mating that individual can provide some very special genetic change. But we believe that greater progress is made long term in a true breeding program when we seek to use sires that make females that excel in as many traits as possible in both phenotype and genotype. For example, we will strive for 28 traits and values in the top 1/4 to 1/3 of the breed rather than have 1/4 to 1/3 of those traits and values in the top 1%-10% of the breed. Top 1% for a few traits create excitement and sell well in the seedstock industry, but for our commercial customers the first scenario is the most profitable and from there we get to "The Most of the Best". Over time this philosophy will make your cow herd, "The Most of the Best" as well and rapidly reduce the number of culls that are a drag on profitability.

We want the mother and the grandmother of every herd sire in our program to meet as many of these qualifications as possible and it makes total sense to us that if we do our job and build that same high standard into the mothers and grandmothers of the bulls you buy from TD Angus at Rishel Ranch you will also create a cow herd that will perform well in your environment and with your feed resources. The goal is a calf crop that will be in demand by all other segments of our industry. Selecting for good phenotype, structural soundness, reproductive soundness and maternal not terminal traits in your cow herd creates longevity and sustainability which all contribute to less culls and greater profitability. Over time bad phenotypes sort themselves out of the population and the herd, but at great cost. Breakdowns in feet and legs, bad udders, and open females will eliminate individuals along the way but the economic risk of not recapturing the cost of putting these females in production is a major economic loss on your bottom line. Think about this.

The average life span of the average seedstock outfit is far less than most commercial operations in our industry. Too many seedstock operations follow the trend of the next "hot" sire. Unfortunately, commercial programs get drawn into the same mentality. If sires for both the purebred and commercial programs are selected to provide the most traits possible for profit in all segments of the beef supply chain we believe the purebred and commercial industry would both be the better for it in the long run. This is what the "Most of the Best" means to TD Angus at Rishel Ranch. It applies to the individual animal and the cow herd as a whole and ultimately to profitability for us and our customers operations.

Bill & Barb Rishel

NEXT GENERATION HERD SIRE SALE

Friday, March 18, 2022

12:30 PM CT / AT THE RANCH / NORTH PLATTE, NEBRASKA

Selling 100 Fall Angus Bulls & 280 Yearling Angus Bulls

SALE LOCATION

3230 E Watts Rd. / North Platte, NE 69101

SALE SCHEDULE

Friday, March 18, 2022 (All Times Central)

8:00 AM - Cattle Available for Viewing

11:00 AM - Complimentary Beef and Noodles Lunch

12:15 PM - TD Angus Feed Test Winners Announced

12:30 PM - TD Angus Bull Sale

Please join us for a Certified Angus Beef meal and beverages following the sale.

LOAD OUTS

Load outs will take place after the completion of the sale.

LIABILITIES All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

FERTILITY AND BVD TESTED All Angus bulls selling have been fertility and BVD tested and scrotal measurements were taken by Dr. Kevan Albertson, Stockman's Vet Clinic, North Platte, NE.

RETAINED INTEREST TD Angus will retain 1/3 revenue-sharing semen interest in all bulls selling. The buyer has full possession and 100% of the salvage value of the bull. Should we want semen on any bull selling in the sale, semen for our use would be collected in the off-breeding season at your convenience and at our expense.

GENOMIC TESTING

All of our cattle have been genomically tested using AngusGS powered by Neogen GeneSeek. **ANGUSGS**

ULTRASOUND Samantha England performed all Angus ultrasound work.

LIABILITIES All persons attending the TD Angus sale do so at their own risk. TD Angus assumes no liability, legal or otherwise, for any accidents that might occur on or about the premises.

SUPPLEMENT SHEET A supplement sheet will be available with complete and up-to-date information on sale day and will be posted online at TDAngus.com.

Check out the QR codes!

Next to each lot is a QR code that will take you directly to a video of that specific bull. Just open the camera app on your smart phone, hover over the QR code and tap the link that appears.

We Offer

VOLUME DISCOUNTS

5% discount: 5-9 bulls purchased
10% discount: 10 or more bulls purchased

DELIVERY Free delivery to any state in the continental United States. Haul your own bulls sale day, Friday, March 18th – Monday, March 21st and we'll deduct \$150/bull. Our goal is to complete all deliveries by May 15. Buyers cooperation in this regard is greatly appreciated. Contact Trey when you brand your calves and he will bring your bulls with him. It gives him an opportunity to view the calf crop and understand your program and its goals with more clarity and direction.

GUARANTEE All bulls are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 60-day period following the first turnout of the bulls. Please notify us as soon as possible when an injury occurs and prior to the injured bull being sold for salvage. Credit for the amount of purchase less the salvage value will be given in next year's bull sale. This guarantee does not include death loss. Mortality insurance available sale day.

CAN'T MAKE IT? Buy with confidence on sale day! A TD Angus representative will buy on your behalf, within your budget, and we guarantee your satisfaction upon delivery.

ONLINE BIDDING

The sale will be broadcast live on DVAuction.com..
Please register to bid at least 24 hours in advance of the sale.

WE APPRECIATE YOUR BUSINESS
and guarantee buyer satisfaction on all bulls.

THANK YOU *to our crew*

Here at TD Angus, it takes a village to bring some of the most elite genetics the industry can offer from conception to turn out time. This is a grind, one that takes meticulous care and effort by all involved. We have told many people that a registered ranch is 4 times of the work of a commercial ranch and nobody could have prepared for the extra care that it takes to produce breed leading bulls for the commercial industry both physically and on paper. For that, we are forever grateful for our team for without them there would be none of this. This is the greatest team of cowboys we have ever had the pleasure of working with. If you see them throughout the year or at the sale, thank them. It is because of them that we have the most of the best. **This is our team.**

Kenny Hanson

Known by those who know the program as the boss. He is one of the greatest cattlemen we have ever had the honor of working with and we continually ask for his advice on which sires are doing their job and which cows are doing their job in the pasture and he has taught us a lot about being a good cowman. We look to him continually for breeding decisions. He is one of the hardest workers we have ever been around, period, and he will outwork men half his age. He is the greatest breeder we have ever met and he has passed on that knowledge to every member of team. He is a great representation of our program as a cowboy and as a man and he not only treats these cattle like his own, but more importantly he treats our children like his own. We would put any herdsman in any breed up against Mr. Hanson and he could teach them all a thing or two. 20 plus years of service here and for that we are grateful.

Nick Kunz

One to not be out worked. Multiple visitors to the ranch or when Nick goes to help Trey ship or AI, customers comment on his work ethic. Nick was here before we bought the place and he is a stable and somebody you can always count on to get the job done and with a great attitude. He does all the night calving, by himself, and of all the cowboys we have worked with he is the best cow hand we have ever employed. In a blizzard or in any tough situation, with our backs against the wall this is the guy you want with you. He has an incredible memory and we are constantly asking him about a cow and what he thinks of her and he can rattle off all of her calves by tattoo and tell us how good of a job she is doing. We trust his judgment for good reason. Nick also tags all the calves the past 7 years and he is the best we have ever seen in identifying a great one at birth. Nick came in this year after a long night of calving, sat down and said, "The Doc Ryans are going to be good." We would bet the ranch he is right.

Matt Wells

A mentor once said that the quietest in demeanor make the best cowboys and Matt is the epitome of that. He is a man of faith and a man of his family and it shows in his work. He has taken so much pressure off Trey from a health standpoint and we can honestly say that the cow herd has never looked better under his care. He is a cowboy at heart, and has no problem saddling a young colt on a sub- zero day to go through his cattle. He is always early and has no problem staying late. We very rarely find a problem in the cow herd that he is not aware of and taken action to correct it. His attention to detail, a very important skill in this industry, is second to none. We are very lucky to have him, his wife, Miranda and their son, Sherman and expecting son live with us.

Ethan Toniolli

Ethan came to the ranch this winter on an intern program from Idaho and multiple times this year we were beyond thankful he was there to help in tough times. In below zero temperatures in the blowing wind he was out in it doing his job. He has a great attitude, is always on time and is personable and polite. We do not know how many calving stalls he mucked out this year, but the answer is most of them and each day he did it without complaint or reluctance. In today's world, it is very refreshing to meet a young man who can show up on time, go to work doing the jobs nobody wants to do and then return the next day and do it again with motivation and a smile. The world needs more like him and he will go far in life because of it. Thank you, Ethan and your wife, Claire for being apart of our team this year.

and all of you!

ANGUS BULL BUYER'S Reference

We want to simplify bull buying decisions for our customers. We try to present data that we believe has great economic merit and do it in a form that is easy to read and understand.

Birth Traits

CED – A higher number, more calving ease.
BW – A lower number, a smaller calf.
Act BW – Ratioed and incorporated into the EPD.

INDUSTRY TREND – Greater numbers of Angus sires are reaching extremely high CED and low BW EPD values, largely due to highly heritable shorter gestation lengths. We do not see it as a positive trend when calves become too small at birth. In addition, none of these birth traits measures calf vigor of a sire's progeny and mothering ability of the cow line. We do that for you.

<input checked="" type="checkbox"/> Cows	82	770	1220	18.9	9	28	60	186	334

- Hfrs
- Cows

OUR RECOMMENDATION for bulls to use on heifers is based on a combination of CED being +6 or greater and BW being +2 or less. We also look at the birth weight history of the bull's mother and cow family and the use of genomic markers and may adjust our recommendation accordingly. Using these criteria, we cannot recall the last time we have had a customer complaint with a calving difficulty problem.

Performance Traits

205 wt. – weight adjusted for age of dam to 205 days, ratioed in contemporary group and incorporated into WW EPD.

365 wt. – weight adjusted to 365 days, ratioed in contemporary group and incorporated into YW EPD.

INDUSTRY TREND – The industry is fascinated with chasing extremes of WW EPD and YW EPD to the top percentiles of the breed, and selection pressure will move them higher. Long-time customers that retain ownership through the feedlot have no problem producing 1450#-1500# pay weight steers from bulls that range from +94 (top 60%) to +126 (top 15%) of the breed. We believe this selection criteria will help us and our customers control cow size and cow maintenance requirements and therefore cow herd costs.

Maternal Traits

CEM – difference in percentage of unassisted births in a bull's daughters as first-calf heifers. A higher number is more favorable.
HP – selection tool to increase probability of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season.
MILK – predictor of a sire's genetic merit for milk in his daughters; it is part of a calf's weaning weight attributed to milk and mothering ability.
DOC – is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility.
SC – expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.
PAP – is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet.

INDUSTRY TREND – We believe that CEM is one of the most overlooked and underutilized values we have in our selection tool box.

We believe that a less stressful unassisted birth in a first-calf heifer helps her be a better mother and allows her to recycle sooner, giving her a better chance of staying in the program for a lifetime of production. This is a major economic impact, considering the cost of heifer development. Similarly, HP has economic impact as well. It is a number we want to know more about, but we have been making an effort to use sires that excel with very positive numbers. When it comes to "milk," we have positioned our herd away from the extremes. We want our cows to milk enough to raise a big calf and not so much that it becomes a liability to reproduction and cow maintenance and to adapt quite well to a vast majority of the environment and resources of many of our customers' programs. The DOC EPD certainly has value as a convenience trait, but also has great economic merit in terms of how cattle perform and function. Higher levels of docility can improve conception rates in A.I. programs and will definitely improve performance in the feedlot.

OUR RECOMMENDATION – We believe these four traits (CEM, HP, Milk, DOC) have a great deal to do with maintaining a cow herd that has both reproductive efficiency and stayability which combined, lead to greater longevity. When a cow stays in the herd long enough to cover the cost of putting her in production, she becomes more profitable to the operation each year thereafter. It is the single biggest economic factor of profitability to the bottom line of a cow/calf operation.

Carcass Traits and Value Indexes

Ultrasound – Phenotypic data taken with an ultrasound machine that is incorporated along with genomic markers for carcass merit into the carcass EPDs.

EPDs – The carcass EPDs are the ultimate selection tool for carcass merit.

\$Value indexes – multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M) – expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W) – is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F) – is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

Grid Value (\$G) – is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B) – is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires. **\$B does not include any prediction of fertility, maternal value or stayability in the cow herd. It is a terminal post weaning and end product economic value.**

Combined Value (\$C) – an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Market your calves in a way that's never been offered before.

FALL BULL MANAGEMENT

This year we have never developed these fall bulls and made them do more with less. They ran on Sandhill grass from May until September where they were brought in and weighed and ultrasound scanned for carcass data. You will notice throughout the catalog each bull has an actual rib fat number. The average on all bulls was .10 inch of backfat and many are under that. Industry standard for fat cattle is .48 inch of back fat. That is a huge, huge difference. Bulls then went back to grass from September and we brought them home on December 20th when the snow brought them. These bulls are not developed for ego boasting weaning and yearling weights and massive scan numbers, that only hamper longevity and fertility of a bull and add red ink to our customers' profit. We do not creep feed and they are raised on Sandhill grass and their mother's milk. That is it. Bill Rishel has always told me this cow herd must be ran like if they took our registered papers and we could still survive. This cow herd does that. These bulls will do that for our customers. Judge them how they are, not what they can be. Have complete faith and confidence that these bulls will hold up and breed more cows than ever before, because they were developed that way.

MUSGRAVE 316 EXCLUSIVE

This should be the easiest footnote I have to write, but it's coming the hardest. This bull means so much to me and my family. I have never, I mean never, used a bull that I couldn't find something I would tweak or change. "Exclusive" is that bull. This bull is the epitome of all that is great in Angus genetics. Our program strives to do it all. Our bulls must sire great long-lasting cows and heavy weighing feeder cattle that have a chance at prime. With the tens of thousands of Angus bulls produced every year, very few can pass that test. "Exclusive" sold the high selling Fall bull last year to the historic and maternally driven Sitz Angus for \$40,000 and another herd bull to Krebs Ranch of Gordon, NE, all in his first offering. I can confidently tell my customers this bull will improve your bottom line and we're proud to offer his sons for your program to do just that.

Heifer bull out of our embryo program out of one of our up-and-coming donors. Elite cow family loaded with carcass merit and marbling. Mother scanned an 8.96 actual %IMF to ratio 156 while still ratio 103 on RE. She will pass as much marbling into her calves as any cow on the place and the grandmother, who was also a donor late into her life did the same thing. This bull reads herd bull all over. Incredible EPD profile that could benefit any program in the breed. Huge growth, top 2% of the breed heifer pregnancy and 5 of the 6 \$Indexes in the top 5% of the breed. We love the "Exclusive" daughters in production and this bull will sire great replacement heifers with the cow power stacked throughout his pedigree.

Bull that puts it all together. Mother is a full sister to herd bull that sold to TC Ranch in 2019 at \$12,500 as the #1 ribeye bull in that year's sale offering. Heifer bull with great power and growth with both weaning and yearling EPDs in the top 10% of the breed. Marbling, Ribeye and carcass weight are all in the top 10% of the breed and \$F and \$B are top 1% of the breed. He will sire great feeder cattle that can hang a prime carcass and put females in the replacement pen.

B/R Nationwide 69

\$110,000 Maternal brother to lot 3

Trey had the opportunity to meet USDA Ag Secretary Tom Vilsack and discuss issues within the beef industry, including the progression of Sustainable Beef, this summer.

Stout bull calf out of the combination of two of the greatest cows we've ever owned with "1551" and "163". The two heifer mates to this flush are one of our favorites in the fall replacement heifer pen. "Exclusive" wet daughters are some of the best females to be on the place, maybe ever. This bull has been stout since birth and it has been fun to watch him develop. 20 EPDs in the top 35% of the breed so he reads like he should. Big ribeye scan and ratio of 107. Save every replacement out of this fella.

A herd bull look with 5 generations of "Lantz Blackcaps" in the program out of this donor female that has an elite production record of 6BWR@97, 6WWR@106, 6YWR@105, 13%IMF@113. She has been a great donor in our program and produced the \$35,000 T/D Lantz Blackcap 83 that sold as a sale highlight in 2019. "83" went on to produce the \$23,000 T/D Choice in the 2021 bull sale as her first calf crop. He has a yearling ratio @101 and an impeccable %IMF scan ratio @132. Even more impressive is that he scored a 10 for tenderness, 14 for marbling, 22 for carcass weight, 9 for heifer pregnancy and 9 for yearling weight on the genomic percent rank. A tremendous bull with phenotype and powerful pedigree behind him.

THE STORY BEHIND THE MANTRA

MOST OF THE BEST

We often get asked from customers about our mantra "the most of the best" and the story behind it. When Dayna and I first bought the Rishel herd, we had not owned a registered female before, all our experience was in the commercial cow/calf sector and feedlot industry. I, like many of our customers, was torn between evaluating cattle based on their phenotype and genotype/EPDs. It was a struggle for me.

One day we were sorting replacement heifers in the alley and I had asked Bill how do we go about this with all the pedigrees and data available and still keep them structurally and fundamentally correct and he simply stated, "Make her have the most of the best." It is by far the most profound and impactful statement I have ever been told and it covers all aspects of life as well.

These cattle look, act and perform the way they do because with that statement that is how they've been bred and designed for 40 plus years. "Most of the best" is not a factual statement, it is a pledge to a strategic and disciplined breeding program that puts it all together with phenotype and genotype. It is not a statement of who and where we are, it is a statement of where we are going. It is a journey, not a destination. Welcome to a journey to be and provide the "most of the best" where you, our customer, is where this program will be tested and excel.

B/R MVP 5247

#18272672 / Sire of Lots 20-46, 165-210

CED	BW	WW	YW	DOC	HP	CEM	MILK

One of our favorite sire groups the last couple years and many customers and fans of the program will agree. "MVP" was leased to ST Genetics and became popular rather quickly for his elite ability to consistently stamp his calves with uniformity, stoutness and a gentle demeanor. Many of our customers have chosen to use him in their AI program on heifers with raving results. "MVP's" cow family is elite in all aspects, in production and phenotype. His wet daughters are some of our favorite on the ranch and they are incredibly gentle and have some of the best udders on young females we have ever seen. No surprise, "MVP" daughters are currently sitting at a 101 Nursing ratio. We knew he was an elite sire, and the data has proved that.

One of our favorite bulls in the pen out of one of the matriarchs of the program and one of the Pride sisters, "1521". Balanced EPD profile all wrapped up in a 299 \$C. This is the kind of mating we strive for, one that will make elite feeder cattle and sustainable replacement heifers. The program!

Flush Brothers **LOTS 20-23** One of our favorite flushes of the entire offering. Out of one of the "Pride" sisters, "1521" is believed to look the best of the sisters for their respective ages. She is incredibly stout, perfect uddered, long necked and always raises a big calf. "1521" has weaning ratios of 101 and a yearling ratio of 103 with 8 calves. This mating stacks up two of the best cow families on the place with the "Prides" and the "Blossoms". If you want heavy weighing feeder cattle and long-lasting replacements, this is that mating.

Exciting new sire group of our newly acquired Herd Bull in Basin Deposit 6249. Trey found this bull on his travels through Montana after seeing his sons at Basin Angus who impressed him with their incredible length of body, perfect foot, stoutness, heavy muscled and sound all while being the top 1% of the breed for weaning weight, yearling weight and marbling. "Deposit" has already sired sons selling to semen companies and females that have topped many elite sales throughout the country. "Deposit" has sired calves in 18 herds that ratio 103 for weaning weight, 10 herds that ratio 103 for yearling weight and 9 herds that ratio 104 for %IMF. The data and the phenotype of this sire group looks promising at the #mostofthebest and we are excited to offer our first set to our customers.

LOT 47

Flush Brothers **LOTS 47-48**

Progressive mating here out of one of our youngest new donors in the program out of our first offering out of our herd sire, Basin Deposit 6249. Fans of the program will notice the grandmother, B/R Blossom 1102 is also the grandmother of the ST Genetics herd sire, B/R MVP 5247. Power in the blood here.

Explosive bull out of a new donor in the program. Cow family royalty in this pedigree with his mother being a powerhouse female and the grandmother was considered one of the most phenotypic cows on the place. Calving ease, breed leading growth with elite carcass merit in this bull. Full sister is retained in the program. He puts it all together. Most of the best.

Great calving ease to growth spread out of a female we purchased at the Nile Angus Female Sale. She is a moderate cow with a perfect udder and fits the Sandhills just right. This bull has an incredible EPD profile with 22 EPDs in the top 30% of the breed and will work for higher elevations. Hard to find one that reads this well and even cooler he is a 1 for Tenderness genomic score. Amazing!

Another elite sire group coming from the sire of record setting and all-time selling, T/D Doc Ryan who sold for \$525,000 last spring in our bull sale. Our good friends Vermillion Ranch purchased Bomber from our other good friends Dave and Carol Medeiros in 2018 for \$190,000. Since then he has been used all over the country and has dominated his contemporary groups. He sired the high selling herd bull T/D Tribute 8351 in 2020 who sold to great friend Grimmis Cattle Co for \$36,000. "Tribute" has the lead off yearling this bull in his first offering in the spring bulls. "Bomber's" influence is daunting in this program. His daughters are long bodied, great uddered and fit for the industry and some of their first sons sell in this sale as well. All these bulls will be paternal brothers to T/D Doc Ryan.

HOOVER NO DOUBT

74	0.88	0.82	61	80	135	195	314

Outcross bull to the program, "No Doubt" has a phenomenal job adding stoutness and density to his calves. They are tremendously wide with chest floor and bring a lot of pounds to the scale. Many visitors to the ranch this winter have loved this sire group. He consistently sires calves that are gentle and with a great demeanor and his wet daughters are some of our favorite on the ranch. They are great to work with, have just enough mothering ability and great udders. This is our last year offering "No Doubt" sons as he is now deceased.

Flush Brothers **LOTS 64-65** Timeless mating here out of the million-dollar semen seller, SS Niagara, dam who was a big bodied, high-volume cow that always raised a big calf. Out of the now deceased, Hoover No Doubt who sired tremendous growth and great females. A mating that won't happen again as both the sire and the dam are both gone. Rare opportunity here.

Power bull out of a great donor at the ranch known as "Niagara's mother". She was a powerful female with tremendous length of body and shape. "Niagara" sold millions of dollars for Select Sires and his daughters are producing machines. One of her last bull calves as she passed away two years ago. Dam record: ACI 8 calves @ 420 days, 7BWR@85, 6WWR@100, 5YWR@103, 24RE@103.

Our program has not been geared to what is perceived as "Right for the Times," but rather to selection criteria for economic value that we believe is right for the cattle business "Regardless of the Times."

Lots of stoutness here. "3210" was the Lot 1 female in our Mature Cow Dispersion last fall and she was also the high selling female at \$27,500 half interest to give her a \$55,000 total evaluation. She is also the mother to Sitz Angus herd sire, T/D Executive who was the Lot 1 and high selling Fall bull last year at \$40,000. Many visitors to the ranch consider "3210" one of the most phenotypic cows on the place, she is absolutely breath taking on green grass and a big calf on her. Full sisters to this bull in the fall replacements are front end and will be fun to mate and market their bull calves in the near future. Superior calving ease with +13 CED that doesn't sacrifice growth.

Embryo transfer bull out of a young donor in the program. "6230" could be the one of the highest volume cows on the place. She is incredibly big bodied, very sound with a near perfect udder. Every visitor that sees her is awestruck in her mass, volume and fleshing ability. Our "No Doubts" in production are gentle, easy fleshing and great uddered and mothers. This bull will make some lasting replacement heifers that will also have tremendous carcass merit.

Second year sire group for this timeless bull. Bill and Trey identified "Innovation" as a bull fit to sire the most of the best in our program after we watched him breed cows in the plains of South Dakota at Maher, Angus. His soundness, impeccable feet with mass and volume is unprecedented in the breed. Watching him breed cows with his powerful build is a sight to see and we have heard multiple customers report the same of his sons. With 17 EPDs in the top 30% of the breed this bull not only packs a phenotypic punch to make great cows but will also make heavy weighing feeder cattle.

Out of one of the most productive cows on the place. "9502" has had 10 calves with a production record of BW@99, WW@102, YW@101 and %IMF@103 with an ACI of 10 calves @365 days. The industry needs more cows just like her, unfortunately we have yet to keep one heifer out of her because she has had 10 bull calves in a row. This mating was specifically made for a replacement heifer and instead we got a stout, masculine, big crested heavy muscled bull. No surprise.

Interesting individual here out of a proven cow with one of the highest marbling EPDs in an "Innovation" son. Mother has a phenomenal record with 6BW@100, 6WW@103, 6YW@101, 6%IMF@109, 6RE@109 with three daughters retained in the herd.

Calving ease bull that did it all right. Passed every test with ratios of BW@92, WW@112, YW@118, %IMF@110, RE@104. Out of a big bodied, wide based "4925" daughter that has brought three big bull calves in a row to the scale.

T/D Cavalry 8308

Full brother to lot 85 sold for \$11,000 in the 2020 sale

TD ANGUS

at Rishel Ranch

Flush Brothers LOTS 83-84

Wild set of numbers on these two flush brothers. Tremendous growth and carcass merit with weaning and yearling EPDs both being in the top 5% of the breed while still being considered a heifer bull. Out of a nice "Weigh Up" daughter that is long bodied and great uddered. These two brothers will sire a tremendous set of feeder cattle, built for the TD Feed Test!

In the spring of 2017, we looked for a bull to follow the A.I. on the best set replacement heifers in the history of the program. We gave \$44,500 for the Triple L / Spring Cove sire, Spring Cove TL "Cat" D13, top selling bull of their 2017 sale. The soundness, power, libido and semen producing ability of this sire is exceptional. We really like his mother and her udder is superb. To top it off, he has excelled as a calving ease sire with muscle. "Cat" was the sire of the high-selling \$30,000 T/D Tiger 8106 to Jocko Valley of Arlee, MT.

SPRING YEARLING BULL MANAGEMENT

This year the Spring bull offering has never been tested to do more with less. You'll notice each bull has an ultrasound scan box stating their actual data. You will also notice the Rib Fat box, this is expressed in inches and to give you a mean the industry standard for beef cattle is .48 inch of back fat. This offering average is .11. That is a huge difference. Instead of the seedstock producer trying to convince you that the offering has not been pushed with grain, we are proving it. These bulls are developed for longevity and fertility first, one of the main profit drivers in sustainability in today's commercial cow herd. These bulls are raised in the Sandhills on grass and their mother's milk, that is it. No creep or grain. Last year there was a discussion at the sale how our bulls are developed and our good customer Tom Walz, leaned over and said, "I run right next to these cattle in the summer. We can't even get a truck up there, more or less a creep feeder. This cow herd is a direct reflection and reality of a commercial cow herd. Trust me." With the largest offering ever, have confidence that these bulls will go out and hold up and breed more cows than ever before because they are designed and developed that way. Guaranteed.

The "Most of the Best". We have been watching this bull since grass time last year and he did not disappoint. Incredible performance ratios of BW@89, WW@116 and YW@118. Mother is a knockout cow that is full made, long bodied, ewe necked and perfect uddered. She is also the grandmother to the \$125,000 Spring Cove Crossfire 26H we purchased last year with Sitz Angus that is seeing heavy use in both programs. Mother has a production record of 4BW@95, 4WW@107 and 4YW@106. His sire, T/D Tribute 8351, the high selling bull to our great friends Grimmuis Cattle Co in 2020, is the all time semen record holder of their program at the stud where he made over 52,000 units of semen in one year. Incredible fertile and longevity built into this genetic masterpiece. We plan to use this bull back into the program to continue to make the most of the best.

#MOSTOFTHEBEST

One of the greatest breeding pieces to grace this ranch.

T/D TRIBUTE 8351

#19218761 / Sire of Lots 100-122

CED	BW	WW	YW	DOC	HP	CEM	MILK

CW	MARB	RE	\$M	\$W	\$F	\$B	\$C
74	0.86	1.15	69	90	123	191	317

Really excited to offer this first time set of sons out of the 2020 high selling Bull to great customer and more importantly friend in Grimmuis Cattle Co for \$36,000. "Tribute" was a fan favorite for his tremendous length of body, bold sprung soundness and tremendous picture perfect front end. "Tribute" broke every record for Grimmuis Cattle Co for semen production by making an incredible 52,000 units in one year, that's 1,000 units a week. Unheard of in the Angus breed. Randall Grimmuis told me one time that "The Angus breed needs this bull and they don't even know it yet." By his first calf crop we would say that he is correct. His lead off son, T/D Troubadour 159 will be used back in the program as well. "Tribute" not only is a phenotypic specimen, but we also wanted to inject the historic and legendary "Ruby of Tiffany" cow family back into the program. He is backed

by eight generations of "Ruby's" that were all born and raised here right on this ranch. His mother has moved into the donor pen after a great start to a long career with 4BWR@96, 4WWR@103 and 4YWR@102. She is a full made, powerful, big bodied female that is really sound on her feet and legs and we think "Tribute" will sire the same. Beautiful feminine replacement heifers and heavy weighing feeder cattle that can make prime. That is the "most of the best".

Flush Brothers **LOTS 101-102**

One of the first big flushes by the 2020 high selling bull T/D Tribute 8351 who was the \$37,000 high selling bull to great friend and cattleman, Grimmuis Cattle Co and out of one of the "Pride" sisters. One of our greatest cow man and customer of the program, Tom Walz, saw these "Tributes" after weaning and he was convinced they were our best sire group and one of these brothers was one of his picks in the entire pen. Many have argued that "1521" continues to get better with age and when it's all done could be considered the best "Pride" sister.

This should be the easiest footnote I have to write, but it's coming the hardest. This bull means so much to me and my family. I have never, I mean never, used a bull that I couldn't find something I would tweak or change. "Exclusive" is that bull. This bull is the epitome of all that is great in Angus genetics. Our program strives to do it all. Our bulls must sire great long-lasting cows and heavy weighing feeder cattle that have a chance at prime. With the tens of thousands of Angus bulls produced every year, very few can pass that test. "Exclusive" sold the high selling Fall bull last year to the historic and maternally driven Sitz Angus for \$40,000 and another herd bull to Krebs Ranch of Gordon, NE, all in his first offering. I can confidently tell my customers this bull will improve your bottom line and we're proud to offer his sons for your program to do just that.

Dam of lots 127-130, 212-216, 272, 320-321

Flush Brothers **LOTS 127-130**

Great opportunity here with a big string of flush brothers by our herd sire, "Exclusive", out of the dam of the \$30,000 T/D Bootheel 7 8445. There is a tremendous amount of length of body in this pedigree and should produce lots of pounds on feeder cattle. It would be great to see this set of flush brothers go out on a big gather of Angus replacement females and cover them, producing half blood sibling calves. Of all things, consistency in cattle is what entices order buyers the most and that is what these brothers would do for a cow herd.

<input checked="" type="checkbox"/> Cows	74	664	1141	10.8	13	24	80	164	277

A super stout stud of a bull calf who is one of the highest marbling "Exclusive" sons in the breed with a +1.35 marbling EPD for top 1% of the breed. His mother is a long bodied, long necked and great uddered female. Mother produced two bulls for over \$20,000 at the 44 Farms Spring Bull sale in 2021. Insane marbling in her pedigree with +1.65 for top 1% of the breed. Bull posted impressive ratios of WW@100, YW@106, IMF@109 and RE@109.

Long bodied and gentle demeanor "Exclusive". 5 of the 6 \$Indexes in the top 20% of the entire breed backed by a fertile cow family out of a first calf heifer. Eighth generation of the "Blackcap Empress" cow family in the program. Grandam posts an ACI 5 calves @ 358 days, 3%IMF@101, 3RE@103 sold to our good friends at BoPat Farms this fall in our Mature Cow Dispersal. Grandam's maternal brother is the \$29,000 T/D Doubt Me Now 0171 herd sire that sold to McWherter Farms in our 2021 bull sale. Great-grandam was a tremendous cow in the program that went to work with an ACI of 11 calves @ 366 days, 10WW@105, 10YW@104, 10%IMF@101 and 10RE@107.

☑ Cows	86	659	Too Young	15.0	13	32	42	155	279

Heifer bull with foot EPDs in the top 4% and 1%. Top 10% \$Feedlot and should work at elevation. Many visitors to the ranch come throughout the year and they almost always ask who "6230" is when they see her in the pasture. She is one of the highest volume females on the place and she transmits that to her calves. Her first calf is the \$22,500 T/D Milestone 8345 and she continues to bring in a big calf every year with 3 calf weaning and yearling weights at 103 respectively. We love this mating to our herd sire, "Exclusive". Since getting his daughters into production we have said they could be some of the best females phenotypically to walk on this ranch. They are long, great footed, great mothers with a perfect udder. This guy will sire some tremendous replacement females and will be heifer safe.

Flush Brothers **LOTS 146-147**

Wicked good set of flush brothers out of the \$30,000 McWerther Farms herd sire, T/D The Plow, mother. We love the stacking of great cows in this pedigree. We cannot say enough how much we like our "Exclusive" wet daughters and this just stacks the predictability of making those great females with the Pathfinder cow, B/R Lady Ida 34, behind this set of flush brothers.

A very smooth and complete made heifer bull out of the famed "Rosa" cow family that produced the herd sire T/D Bootheel 7 8445. Out of a first calf heifer whose full sister sold in our 2020 sale to one of the best cowmen we know, Joe Watkins of Claude, TX. Balanced trait bull who will work at elevation.

Really sound, moderate and deep made. Very maternal pedigree here and it shows in his EPDs with a huge heifer pregnancy EPD in the top 1% of the breed and a wild +104 \$Maternal, also in the top 1% of the breed. Top 3% \$C. We really like this "Playbook" x "Exclusive" cross. We have had phenomenal success with this mating in the past with multiple half siblings to this bull in production and we really like the result. "K7107" first calf sold at \$11,000 as herd bull to BoPat Farms in 2021.

61	0.74	0.78	60	73	116	173	284

One of our favorite sire groups the last couple years and many customers and fans of the program will agree. "MVP" was leased to ST Genetics and became popular rather quickly for his elite ability to consistently stamp his calves with uniformity, stoutness and a gentle demeanor. Many of our customers have chosen to use him in their AI program on heifers with raving results. "MVP's" cow family is elite in all aspects, in production and phenotype. His wet daughters are some of our favorite on the ranch and they are incredibly gentle and have some of the best udders on young females we have ever seen. No surprise, "MVP" daughters are currently sitting at a 101 Nursing ratio. We knew he was an elite sire, and the data has proved that.

T/D Ruby of Tiffany 3210

Dam of lots 66, 165-166, 305, 318-319

T/D Executive 9604

Maternal brother of lot 165 sold in 2021 for \$40,000

LOT 165

LOT 166

Flush Brothers **LOTS 165-166**

Blending of two elite cow families from the "most of the best". "3210" was the high selling female from our Mature Cow Dispersion last fall selling for \$27,500 half interest. She is the mother to the high selling fall bull last year, T/D Executive 9604 selling to the historic Sitz Angus cow herd. Her daughters are starting to have a direct impact on our program and we feel her story is just being written. With the mating of "MVP" and his elite cow family behind him, this set of flush brothers will most certainly make some of the best replacement heifers a ranch could have.

Power bull here out of beautiful first calf heifer with both weaning and yearling weight EPDs in the top 2% of the breed all in in a 314\$C top 2% of the breed. Out of 7 generations of the "Blackcap Empress" cow family. Great grandmother, "2247", is still a donor here and is easily one of the widest and stoutest cows on the place.

FEEDER CALF BUY BACK PROGRAM

Here at TD Angus we recognize and appreciate the genetic value these cattle have and most importantly how they can perform in the feedyard, specifically on the grid evaluation. As the seedstock producer, we believe our job does not end when the bull leaves the ranch and our commitment to our customer continues from the pasture to the plate. As in past years, we would continue to encourage our customers to contact us at anytime when they decide to market their calf crop so we can assist as representatives or most importantly as potential buyers. There is no fee or any hidden commissions to enter this program, we don't need to run them through a chute or put a special tag in their ear to estimate or understand their value. Any weight, any sex, at any time of year we are continually looking for cattle that fulfill the "most of the best" in the feedyard or as replacement heifers. Feel free to contact us at any time.

Flush Brothers LOTS 173-176

Big set of flush brothers out of not only the oldest donor on the place, but also the oldest cow on the ranch. She passed this last summer and the young age of 16 years old and died with a perfect foot and udder still. We are very thankful we had a big flush of hers by our herd sire, "MVP" so some of her daughters could continue on her legacy in the herd. If we had a big string of replacement heifers, these are the sons we would cover them with.

A very stout, balanced trait heifer bull out of a neat mating of two elite cow families joining together from two programs with the full sister to the dam of Musgrave 316 Exclusive and the flawless cow family behind home raised herd sire, B/R MVP 5247. She is a powerful cow that is big bodied and perfect uddered with an average calving interval of 6 calves @ 362 days. We wish there was hundreds of this kind, but there is only one. Keep every heifer out of this fella.

68	1.43	0.60	77	85	105	185	317

Exciting new sire group of our newly acquired Herd Bull in Basin Deposit 6249. They found this bull on his travels through Montana after seeing his sons at Basin Angus who impressed him with their incredible length of body, perfect foot, stoutness, heavy muscled and sound all while being the top 1% of the breed for weaning weight, yearling weight and marbling. "Deposit" has already sired sons selling to semen companies and females that have topped many elite sales throughout the country. "Deposit" has sired calves in 18 herds that ratio 103 for weaning weight, 10 herds that ratio 103 for yearling weight and 9 herds that ratio 104 for %IMF. The data and the phenotype of this sire group looks promising at the #mostofthebest and we are excited to offer our first set to our customers.

Herd bull. One of Trey's favorite bulls in the pen. The last calf to sell out of the legendary B/R Blossom 1102 who is the grandmother to ST Genetics herd sire, B/R MVP 5247. During her time, she was one of the biggest bodied cows on the place and pave a wide swath walking the Sandhills. This bull has been a standout since the beginning. It is ironic that this is "1102's" last year selling progeny, but Basin Deposit 6249's story is only just the beginning with this year's first progeny selling. His EPD profile will make genetic improvements for any program.

CW	MARB	RE	\$M	\$W	\$F	\$B	\$C
66	0.30	0.60	46	74	112	146	235

Easily the most influential bull in our program in the last 10 years. He has consistently sired top selling bulls and has had the top selling sire group four years in a row. In 2017 he sired the record setting B/R Nationwide 069 who sold for \$110,000 to ten breeders throughout the nation. In the 2018 sale he sold the \$30,000 T/D Attila 711 to Knox Bros from Tennyson, TX and in 2019 he sired the T/D Tiger 8106 who sold for \$30,000 to Jocko Valley Cattle from Arlee, MT. It is an understatement to call "Cavalry" a herd bull. He is a breed changer. He has over 415 daughters that have a nursing ratio of 101. His daughters litter our donor pen and he will be forever enshrined in many pedigrees for generations to come. He is a youthful 9 years old and still gets turned out and routinely breeds cows in the Sandhills every summer.

The "Cavalry" x "Full Power" cross is one of our favorites on the ranch. Females in production out of this cross are really long bodied, great uddered and fertile. Heifer bull with adequate growth with weaning and yearling EPDs in the top 20% of the breed and a balanced EPD profile to get you heavy weighing feeder cattle and beautiful replacement females. Lots of marbling in this pedigree with "Full Power", "Demand" and "New Design 323" and "036". Dam record: ACI 4 calves @ 370 days, 3BWR@97, 2WWR@101, 2%IMF@112.

Natural calf out of a young donor who was our pick of the first calf heifers to flush and bred back with this herd bull. Excellent maternal excellence in her pedigree with her mother who is in the donor pen and 6 generations of "Blackcap Empress" females in the program behind her. With "Cavalry" and her maternal pedigree, every heifer will be worth keeping out of this bull.

Another big growth bull where two great pedigrees collide. A balanced EPD profile backed by solid genomic ranks of 2 for weaning, 4 for yearling, 2 for heifer pregnancy, 3 for carcass weight and 26 for tenderness.

Flush Brothers LOTS 234-236

An exciting set of flush brothers by "Cavalry", who needs no introduction to with his influence in our program the last 10 years with the high selling sire group four years in a row and reputation for producing easy fleshing, perfect uddered, deep bodied, gentle demeanor females that make up a good percentage of our donor pen. Their dam is the full sister to "Tour of Duty" and was the top bred cow at the Riley Brothers 2017 sale at \$30,000 for 1/2 interest. Her flush sister produced the \$200,000 high seller in the 2017 Las Vegas Final Sale. Another flush sister is a standout in the donor pen at our friends, Linz Angus. Incredible power in the blood in this set of flush brothers.

A long bodied heifer bull out of beautiful young female we bought from our friend, Randy Lancaster at Triple L Angus of Bliss, Idaho who has a great start as a productive cow with an ACI of 3 calves @ 375 days and 2WW@103, 2YW@105. Bull as in individual did a phenomenal job with ratios of BW@96, WW@106, YW@108 and %IMF@107. The heifers out of this bull will be the keeping kind.

Flush Brothers **LOTS 242-244**

Stout set of flush brothers out of a powerhouse cow and our long-time herd sire, JVC Cavalry V3326, have been crushing the scales since the beginning. They are full made, big ribbed and massive built. "Cavalry" daughters need no introduction in our program as they continue to impress with their motherly instinct, perfect udder and fleshing ability. If somebody had a wicked good set of replacements and wanted to make a consistent calf crop, you could put all three of these boys on them and make 1/2 blood siblings. Order buyers love language is: performing genetics, condition/weigh up, consistency. Here is where that starts.

RB Lady Standard 305-02

One of the largest weaning and yearling weight EPDs in the sale, both in the top 1% of the breed with as much as foot and bone as any "Cavalry" ever. Awesome growth ratios of weaning @118 and yearling @128 and a RE@108. Will add massive pounds to a calf crop. Mother is a powerhouse female. Grandam is a full sister to, "890", that sold for \$175,000 at the National Western Stock Show in 2014 and has produced over \$2,700,000 in progeny sales, "Active Duty 010" and a maternal sister to "Tour of Duty 177", ABS and ORigen A.I. sires. As a yearling heifer "077" recorded an actual 8.63 %IMF for a ratio of 150 making her the best %IMF sister to "Active Duty 010".

"Nationwide" was the show stopping high selling bull of 2017 that went to ten breeders throughout the nation for a record \$110,000. Due to his untimely death, very few sons have been sold and we have used him extensively in our embryo transfer unit. He has proven to be a tremendous sire of growth and performance with weaning ratios at 103 and yearling ratios at 104 and a tremendous %IMF ratio 103. His mother, "1551", is the matriarch of our program and has numerous daughters in the herd and many in the donor pen. She, along with her flush sisters "1421" and "1521" were the high selling females to McWherter Farms in Dresden, TN when they swept the ring at \$22,500 and took them all. Power in the blood here.

Long bodied heifer bull with a great scrotal and heifer pregnancy, both in the top 3%. Phenomenal growth EPDs with both weaning and yearling weight EPD in the top 15% of the breed and a top 3% \$Feedlot. "Nationwide" semen incredibly hard to find and almost nonexistent. This is a really good bull in the pen. He is stout, rugged and muscular and incredibly sound. He will make heavy weighing feeder cattle and leave you tremendous replacement females. Should also work at elevation.

Outcross bull to the program, "No Doubt" has a phenomenal job adding stoutness and density to his calves. They are tremendously wide with chest floor and bring a lot of pounds to the scale. Many visitors to the ranch this winter have loved this sire group. He consistently sires calves that are gentle and with a great demeanor and his wet daughters are some of our favorite on the ranch. They are great to work with, have just enough mothering ability and great udders. He is the sire of T/D Doubt Me Now 0171 who sold last year for \$29,000 to progressive breeders at McWherter Farms. "Doubt Me Now" is being used in the program and will take the place of his sire with his moderate birthweight, high heifer pregnancy, low pap and elite carcass quality and out of a phenomenal long time productive female, B/R Blackcap Empress 9150.

Raw power in this pedigree. For the cattleman looking to add performance and pounds to his cow herd, this bull should do it. A real wide based, power bull that posted impressive growth ratios of WW@114, YW@108 and had great scans of %IMF@107 and RE@117. Top 2% of the breed for both weaning and yearling weight EPD and 1% for \$C. It won't take long for him to inject real performance into a calf crop as he will sire a heavy weighing set of feeder cattle that will grid and hang a beautiful carcass. Out of one of the promising young donors in the breed who scanned an incredible 8.96 %IMF to ratio 156 in her respective contemporary group.

A big bodied bull with loads of mass, rib and middle. Calving ease son of "No Doubt" with lots of carcass merit out of productive cow who was moderate and has that "Sandhill cow" look out of an "Ambush 28" daughter. She has a production record of 5BWR@100, 5WWR@101, 5YWR@103, 5%IMF@114, 5RE@100 and ACI of 5 calves @ 371 days. Under missed management she should have been in the donor pen. This bull will inject marbling in one generation.

Cobra necked out of "Demand" daughter that silently did her job with exceptional marbling top 1% and heifer pregnancy in the top 15%. Calving interval of 5 calves @ 366 days and three of her daughters are retained in the herd. Bull does a lot correct with top 10% of the breed for weaning, yearling, carcass weight, marbling and wrapped together in a 299 \$C top 5% of the breed.

Flush Brothers

LOTS 267-268

"6230" is one of the highest volume females on the place and cuts a wide swath when she walks. She is the mother of \$22,500 T/D Milestone 8345 and at her young age she is already making an impact within the program. She has drug in a big calf every year with weaning and yearling weight ratios of 103 respectively. She transmits the same volume and body onto her calves and with the mating to the now deceased Hoover No Doubt, this set of full brothers will make a powerful set of calves.

Unique "No Doubt" son that can be used on heifers. Mother is a big bodied, perfect uddered female. Bull posted an impressive individual ratios of BW@98, WW102, YW@106, %IMF@126 and RE@114. He puts it all together.

Baldrige Pappy

Sire of lot 276

A calving ease son of the very popular Hoover No Doubt and was an outlier for stoutness and feet and sold for \$110,000 at the 2018 Baldrige sale. His mother is proving her way as a productive cow and is long bodied and great uddered. We loved his phenotype with his carcass merit and because of semen availability he was only used on a handful of flushes for embryo transfer and this was a the result of that.

One of the biggest weaning and yearling weight EPDs in the sale out of a first calf heifer that was our pick of the entire age crop to flush. What a job she did on her first calf with weaning and yearling ratios of 121 and 111. She is a stout, big bodied female and her mother is one of our favorite young cows on the place, who is also in the donor pen with an ACI of 4 calves @ 364 days, 3WWR@110, 3YWR@103, 3%IMF@130 and 3RE@114. Love this pedigree, with 4 of the 6 \$Indexes in the top 1% of the breed.

"Enhance" ranks as the #1 bull in the main Angus sire summary for the new cumulative Index in \$C. He is known for his proven calving ease, performance growth, mature height and elite carcass values. His calves are some of the most vigorous calves we have had in recent years around the ranch and we have had calves born in negative temperatures and walk with their mother into the calving barn at under an hour old. "Enhance" sired the \$30,000 fall bull in 2020, T/D Bootheel 7, who also has sons selling.

T/D Blossom 7219

Dam of lots 47-48, 124-125, 302-303

Flush Brothers **LOTS 302-303**

Calving ease, high performance growth and carcass merit coming out of one of the most promising donors in the program. This donor dam has tremendous body and volume, is perfect uddered and can flat raise a whopper of a calf. She is out of the maternal herd sire, "Playbook" and her mother is the grandmother to ST Genetics sire, B/R MVP 5247. Royal pedigree stacked with tremendous cows.

The best "Enhance" we've ever raised. Big middled and long bodied. Great calving ease bull suitable for heifers to a top 5% weaning and top 3% yearling weight. 4 of the \$Indexes are in the top 5% of the breed or better. Genetic value here out of a great cow. His dam, "3210", was the high selling female from our Mature Cow Dispersion last fall selling for \$27,500 half interest. She is the mother to the high selling fall bull last year, T/D Executive 9604 selling to the historic Sitz Angus cow herd and she is proving to pass on her unprecedented phenotype onto her calves. Many astute cattlemen have seen her and have remarked on her flawless type and kind. "Enhance" will add some carcass merit and marbling to this mating.

Check out the QR codes!

Next to each lot is a QR code that will take you directly to a video of that specific bull. Just open the camera app on your smart phone, hover over the QR code and tap the link that appears.

CW	MARB	RE	\$M	\$W	\$F	\$B	\$C
39	0.65	0.66	57	65	89	142	241

Second year sire group for this timeless bull. Bill and Trey identified "Innovation" as a bull fit to sire the most of the best in our program after we watched him breed cows in the plains of South Dakota at Maher, Angus. His soundness, impeccable feet with mass and volume is unprecedented in the breed. Watching him breed cows with his powerful build is a sight to see and we have heard multiple customers report the same of his sons. With 17 EPDs in the top 30% of the breed this bull not only packs a phenotypic punch to make great cows but will also make heavy weighing feeder cattle.

Flush Brothers

LOTS 310-311

Awesome mating out of the mother of perennial Herd Sire B/R MVP 5247 and the female making MAR Innovation 251. This set of flush brothers are stout with high volume and a great foot. This mating was specifically made for females so it shouldn't surprise anyone the heifers look like heifers and the bulls look like bulls. If we have any customers that are maternally driven this year and looking to expand their replacement pen these are the brothers that will do that. Elite Angus replacement heifers moving forward in a declining cow supply have never been more important.

Another bull that was made specifically for a heifer and we won't complain about it. Completely crushed the scales with growth ratios of WW@130 and YW@110. Out of the famed "Pride" cow family-- keep every heifer out of this bull. Mother laid down and had an "MVP" bull calf 365 days later and he is a whopper.

Only bull in the flush, but a great one. Out of our selection of the Baldrige Performance Angus herd, Baldrige Isabel F047 is flawless in her phenotype and udder quality. Since her unveiling last summer at the Baldrige Female Sale and our Mature Cow Dispersion, she has sold over \$120k in female sales in one year with four calves. A full brother sold in January to our good friend at Linz Heritage Angus at \$75,000. This female is flat special, and her story is just being written now and this herd sire prospect will help. He does a lot right.

Proven calving ease sire who was used to bring incredible carcass merit and high heifer pregnancy to the program. His sons are moderate, stout and very sound. They carry exceptional pounds with a very athletic movement. He is deceased and semen is limited and was only used on select females in our embryo program. We also purchased a son of Identified with a group of progressive breeders in the industry last spring, HCC Whitewater 9010 # 19870506 for a record \$280,000 who's first calves hit the ground this spring and they are dense made, really cool looking and have that herd bull look in a jet black package. With his calving ease, carcass merit, mature cow weight and high heifer pregnancy we are excited to offer his sons in 2023.

Confidence Plus is a proven bull that offers a unique combination of calving ease and growth combined with carcass traits, docility and heifer pregnancy, making him a true genetic breed-leader. His mother, "1209", was one of the most phenotypic cows we have ever laid eyes on. He is deceased and semen is in high demand and we used him specifically on some of our best cows to make lasting replacement females. If you are looking to add some highly valuable industry traits to your replacement pen this bull will do just that.

Flush Brothers **LOTS 318-319**

"3210" was the high selling female from our Mature Cow Dispersion last fall selling for \$27,500 half interest. She is the mother to the \$40,000 high selling fall bull last year, T/D Executive 9604 selling to the historic Sitz Angus cow herd and she is proving to pass on her unprecedented phenotype onto her calves. Many astute cattlemen have seen her and have remarked on her flawless type and kind. "Confidence Plus" is now deceased and is known throughout the breed for his great daughters.

Outcross bull we used in the program to add phenotype and calving ease while still keeping the carcass merit in them. "Thunderball" was the top selling bull at the 2018 Sitz Spring sale and after seeing him at the stud we were one of the first to purchase semen. He sired a nice set of sons that are very sound, full made, and big nutted. We believe his females will make tremendous cows. Due to his untimely death and limited semen, only a select few sons will be sold across the nation.

103 %IMF ultrasound scan ratio out of a first calf heifer by one of our favorite maternal sires, "4925". Dam's maternal brother sold as Lot 66 in 2021 at \$9,500 and eight of dam's maternal sisters are retained in the program. Grandam was the powerful "133" donor cow and great-grandam was another powerful donor in the program. Grandam's maternal sire, B/R Destination 727-928, was the \$22,000 top-selling bull to ABS Global and Maassen in 2000. The "928" great-grandam is the mother of "New Design 036". Great-grandam ACI 8 calves @ 314 days.

38	1.36	0.48	59	75	73	150	254

New sire group to that ranch that is a proven bull that has over 3,000 progeny turned in for birthweight and holds a top 10% of the breed for birthweight. He has an amazing birth to growth spread with over 2,500 calves turned in for weaning weight which is top 15% of the breed and over 1,500 calves turned in for yearling weight putting him in the top 10% of the breed. To go with his growth he also brings tremendous amount of carcass merit to the table with a top 2% of the breed marbling EPD and his sons scan exceptionally well. His sons are stout, wide based with exceptional foot quality and his wet daughters in production are easy keeping, broody females with perfect udders. He will sire a big time set of feeder cattle that have a chance at hitting a prime premium and will produce powerful daughters that will raise the same.

In the spring of 2017, we looked for a bull to follow the A.I. on the best set replacement heifers in the history of the program. We gave \$44,500 for the Triple L / Spring Cove sire, Spring Cove TL "Cat" D13, top selling bull of their 2017 sale. The soundness, power, libido and semen producing ability of this sire is exceptional. We really like his mother and her udder is superb. To top it off, he has excelled as a calving ease sire with muscle. "Cat" was the sire of the high-selling \$30,000 T/D Tiger 8106 to Joeko Valley of Arlee, MT.

A good heifer bull with added carcass merit with scan ratios of %IMF@109 and RE@112.

Flush Brothers **LOTS 378-380** Scale crushing mating here from the powerful "C07" donor who is breathtaking in her type and kind. This set of flush brothers are elite in their performance and growth, being in the top 1-5% of the Angus breed for weaning and yearling weight. If a cowboy needed to add some pounds to his calf crop, this would be the predictable way to do it and also add beautiful replacements to their herd, just like the donor dam.

Heifer bull with a double-digit calving ease direct EPD. Top 2% of the breed for heifer pregnancy. Great carcass quality with a 116 %IMF ratio. We really like this mating out of the "C07" donor who is absolute showstopper in person. We love the "Denver" daughters, one of the main reasons we bought Basin Deposit 6249, whose mother is a "Denver". This bull is well rounded and has an exceptional EPD profile. He will make performance feeder cattle with a chance at prime and still make replacement heifers with a great cow behind him.

Power mating here out of one of the longest and oldest donors on the place who raised a calf until this year at the age of 16 years old. "New Frontier" daughters need no introduction here. He is considered by long term customers as the best female maker that the program had ever had. A full sister to this bull is one of our favorite young cows in the fall herd and "5120" daughters are perfect uddered and very fertile. Big growth with weaning weight EPDs in the top 5% and yearling in the top 3%. Stout bull with a big middle. Great carcass scans with ratios of %IMF@102 and RE@102 with a top 2% ribeye EPD and a top 15% \$C.

Long and rugged made bull sired by the legacy sire, B/R New Frontier 095 and out of the record setting \$250,000 female, B/R Ruby of Tiffany 9148, at the Angus Foundation Female Sale in 2006. "New Frontier" has been recognized throughout the breed for fantastic females with superb udders and great dispositions.

COMMERCIAL HEIFERS

We have a limited offering of replacement heifers this year because of such high demand for quality and uniform groups sired by our bulls. More importantly, many replacement heifers that we are usually offered on an annual basis were not offered for sale by our customers because we strongly advised them if they had the feed that they needed to hold onto them and retain all the heifers they could. It is no secret this cow herd is in a drastic decline, with a 2% decrease since last year and we now have the lowest numbers of cows in production in 7 years because of that, is creating great opportunity. Going forward the elite Angus female that can sire heavy weighing calves that have a chance at hitting a prime grade and will also put replacements in the pen will never be more valuable. These commercial heifers will do just that. TD Angus and it's crew will also come AI breed these heifers free of charge upon purchase.

Lot A: Bryan and Amy Hauxwell - 140 head - 800# Back by popular demand, one of the most powerful set of Angus replacement heifers sired by the "most of the best" and are second to none. These are the very front end of 400 plus heifer calves. They sorted these out of the entire calf crop. These are the best set of replacement heifers we have seen sell this year. We have order buyers all over the nation that are told to keep a look out for females just like these, and we have not gotten one set in or seen another set that is better. These are the most of best. More importantly, every bull that sired these females have been at or below sale average. That tells us a lot about our program. You can come here and have confidence that you will get a bull for your budget that will produce elite, long lasting efficient females and powerful feeder cattle. We are very proud of that, and very proud to offer this set of heifers to our customers.

Lot B: Bootheel Ranch - 85 head - 600# Coming from the two-time T/D Feed Test prime and CAB percentage champions, Bootheel 7 Ranch. I always tell customers if they are going through Lusk, WY to stop into the ranch and view the cow herd because it's not only one of the best commercial cow herds I have ever seen, but also one of the largest for uniformity. Steer mate brothers to these heifers sold in Torrington, WY in February and brought \$2.15.50 #650. Unique opportunity to buy genetics from a 100 year old ranch family that is in all aspects of the industry, from genetics to the consumer with their booming branded beef program, self-titled "Bootheel 7 Ranch Beef" that has customers all over the nation. Check them out online at bootheel7ranch.com. Heifers will come perfectly healthy, right off the ranch and green.

LOT C: Alyward Angus - 169 head - 750# Rare opportunity here. First and only time we have ever got to offer the Alyward replacement heifers. These heifers are out of a working cow herd that have ran the Sandhills for generations. The Alyward steers are always some of the best to be offered on the summer video and these would be the sister mates to them. They have not been topped or sorted on. This is the very front end. They have been slow grown and are on a meager growing ration to insure longevity. We would like to see these heifers AI to "Exclusive" and then cleaned up with sons of his. We think it is a very complimentary mating on these moderate, easy fleshing, gentle heifers and the calves would be scale crushing and beautiful females and will see a very big feeder market.

Trey Wasserburger 307-660-8650
Bill Rishel 308-530-7999

Horses are our passion and we are very blessed we get to use them on a daily basis in our operation. 365 days a year a horse gets saddled in our family operation, from the ranch to the feedlots. Finding a source for a well made, well bred and well trained ranch horse has never been tougher. Like Grandpa once said, "There just isn't a lot of country boys out there anymore that will ride and make a young one." Year after year we continue to see the horse market climb and break new records simply because of that reason. Just like our bulls, we think this is the best source for quality and price in the ranch horse business. Every year we place these horses in ranches all over America will overwhelming results and this year we can say this is probably our greatest set of ranch horses we have ever sold period. We have never had 7 ranch geldings that we could take to do any job at any time with no maintenance issues. These are the real deal.

Please contact our good friend and great horseman, Jeremy Knoles (806-330-1701) before the sale and try these horses. They sell fully guaranteed.

**DUN
GELDING**

This is a special horse to a lot of people. Teddy is stout, pretty and gentle for anybody. He is a beautiful dark buckskin color with big dorsal strip and a stout hind quarter and out of a son of NCHA Hall of Famer, Playgun. This horse has seen more miles and different country than a highway patrolman from the Sandhills of Nebraska to the hollers of Tennessee where he has been used in all aspects of ranching doing all the chores. He has been calved on, rode in the feedlot, gathered big pastures on long days and roped everything he's been turned on. More importantly, the horse is soft hearted and kind. He is quiet as a church mouse and we can trust our young children not only around him but on him. He is only for sale to dissolve a partnership between my good friend and cowboy Peyton Pruett who has rode him the past year in the rolling hills in Tennessee. Of all the geldings I have started and rode, this one is special and once in a lifetime. Contact Peyton Pruett at 731-988-8470 for more information.

**PALOMINO
GELDING**

Really cool horse here who has spent a couple years with good cowboy and customer Jared Cox. For fans of the program, they know that Jared's horses always come with an accomplished and extensive resume. Jared is one of the best cow hands I have ever been around, period. He is a gorgeous dapple palomino with a big blaze face and four white socks and turns heads everywhere he goes. He has been used in big pastures gathering and doctoring cattle and used in the sale barn sorting and penning back. He is super trainable and gets better every ride. He saddles up gentle everyday and the days you don't ride him you will catch yourself watching him in the pasture with his drop dead looks. Nobody wants to feed an ugly one. **RED DUN
GELDING**

Own son of the legendary "Gunnatrashya" who was an NRHA Open Futurity champion and the sire of money earners of over \$7 million dollars. Perfect size at 14.2 HH and #1100. Turbo is incredibly broke and fancy in the bridle and can spin a hole in the ground. He is easy to catch and the one that everybody wants to ride. He has been used to doctor wheat cattle and has been ridden through a lot of rough country on the ranch. He got his start roping calves with NFR calf roper and renowned trainer Brent Lewis and has the foundation to make a good calf horse if that is the direction you choose. Whether your discipline demands a supreme gelding he is sure to fit any program. He stops as hard as any, can really turn around and really cowy. Offered by our good friends Travis and Kylee Chester. Contact Travis Chester at 806-664-1228 for more information.

GELDING**

One of the most cowy and athletic geldings we've ever offered. A rare and beautiful red roan son of NCHA Futurity winner Sophisticated Cat and out of an own daughter of the legendary Peppys from Heaven. Trey used this horse to heat detect and bring hot cows in last year during the AI season and took him to multiple brandings. He has spent the last year with NRHA money earner Colt Caldwell of Tennessee being used in the bottoms and rolling hills gathering cows and doing all the ranch chores. Beautiful look to him with a long red roan mane and tail and tremendous ability. More horse than most, this horse has a ton of feel and needs a rider with that kind of experience. A rope horse prospect unlike any we offer, if used correctly this horse will have tremendous success. Contact Colt Cardwell at 731-796-0969 for more information.

**SORREL
GELDING**

Stout made, classy looking gelding that Andrew Wasserburger used in the big tough country of Niobrara County in Wyoming. Everybody that has ever rode a horse from Andrew compliments their cowyness and ability to travel. Andrew roped and doctored a lot of yearlings on this gelding and he would make a rope horse in no time. This horse has seen everything from the ranch to the feedlot and has never taken a lame step or humped up doing it. I shipped grass cattle, one of the most stressful days of the year (almost as bad as a bull sale) on this gelding last year and really enjoyed him and I never felt one time that I wasn't mounted or if I needed him to get me in the right spot that he wasn't capable of it. Like great horseman Craig Haythorn told me, "A good horse is a good color." And this one is that. Contact Jeremy Knoles at 806-330-1701 for more information.

TD ANGUS
at Rishel Ranch

Exclusive is with one of the 316 sons Musgrave's have decided to use heavily. His flawless phenotypic package offers super foot structure with a massive, muscular presence. Use him to add power and performance to your cow herd.

REG: AAA 18130471 • DOB: 2/6/2015

ST Genetics

We had the opportunity to acquire a portion of the bull while Bill was visiting Musgrave Angus and saw him at work on cows and he was thoroughly impressed. He is the highest \$B "316" son that offers exceptional docility, great feet and structure while still maintaining an EPD profile that ranks him as one of the top carcass sires in the breed. **Semen is available in conventional and sexed semen through ST Genetics.**

a sire with the
Most of the Best!

Semen packages
for sale now!

One of the most proven bulls being used in the Angus breed today. With a phenomenal progeny record with 706 birthweights reported with a ratio of 100, 602 progeny reported a weaning weight with a ratio of 103, 284 progeny reported for yearling weight for a ratio of 104. He is the sire of the TD Angus high-selling \$110,000 B/R Nationwide 69 and \$36,000 Attila. His sons are sale toppers, but his daughters make him a timeless bull with 47 daughters in production with an average nursing ratio of 104. Cavalry has produced daughters topping the female division at \$60,000 and \$30,000 at the TD Angus Bull and Female Sale and last year featured the \$30,000 T/D Tiger 8106, raised by a Cavalry daughter.
